

THE BLAIRMORE ENTERPRISE

VOL. XXIX, No. 43.

THE BLAIRMORE ENTERPRISE, FRIDAY, OCTOBER 25, 1936.

\$2.50 PER ANNUM

YOUNG PEOPLE'S RALLY

A very successful young people's rally, including towns of The Pass, was held in Central United church, Blairmore, on Friday last, when upwards of one hundred young people were present.

The guest speaker of the evening was Rev. E. B. Burkholder, of Vancouver. Rev. E. B. Arrol, of Blairmore, was in charge of the proceedings; Rev. H. J. Bevan, of Coleman, conducted the devotional exercises, and Rev. R. Upton, of Bellevue, introduced Mr. Burkholder, who spoke on some essentials in young people's work.

A splendid programme of vocal and instrumental music was much enjoyed; those taking part were Freda Antrobus, Lena Fraser, Iris May, Berta Harmer, George Burles, Billy Royle, and the church orchestra.

The young people also enjoyed a period of community singing, led by Mrs. R. Upton, after which the gathering adjourned to the basement, where excellent refreshments awaited them.

LIBERAL LADIES ORGANIZE

During the convention of Liberals of the Macleod federal constituency recently, the lady delegates and visitors left the convention for the purpose of an organization meeting.

Addresses were heard from provincial officers of the ladies' section and the following officers were elected:

Mrs. J. W. McDonald, of Macleod, and Mrs. F. O. McKenna, of Pincher Creek, honorary presidents.

Mrs. E. Greenwood, of Macleod, president.

Mrs. M. J. Gillis, of Blairmore; Mrs. George Skelding, of Macleod; and Mrs. S. C. Williams, of Claresholm, vice-presidents.

Mrs. M. Dean, of Macleod, recording secretary.

Mrs. M. L. Jordan, of Macleod, treasurer.

Mrs. J. Burke, of Macleod, corresponding secretary.

Mrs. F. Kusabab, of Bellevue, financial representative.

NORTHERN MESSENGER SERVICE TO OPERATE AGAIN ON NOVEMBER 4

Announcement has been made by the Canadian Broadcasting Corporation that the Northern Messenger Service, by which messages of importance are sent via radio to those in isolated parts of Canada's north country, will be resumed this year on Friday, November 4th, 11 p.m. C. S. T., 10 p.m. M.S.T.

Communications may be sent only to points which have no other contact with the outside world.

Messages intended for transmission should be sent this year to The Northern Messenger Service, The Canadian Broadcasting Corporation, 941 Church Street, Toronto, Canada.

Statistics compiled by the Nova Scotia highways department reveal the fact that 97 per cent of accidents are caused by sober drivers.

RECREATIONAL CENTRE

At a well attended meeting, held in the Columbus hall on Monday night, a committee was elected for the physical and recreational training centre, to be held in Blairmore under the Dominion-Provincial programme. The committee consists of C. J. Shaw, R. Jamieson, J. Leskovsky, J. Packer and Joe Morency.

Following the election of the committee, the training programme was outlined by L. Pozzi, and the meeting was then unanimous in asking for the classes to start on Tuesday, November the 1st.

It is hoped to have the ladies' classes organized in the very near future. In the meantime, you men, old and young, dig up your sneakers and gym togs; let's meet at the Columbus hall on Tuesday night, November 1st, at 8 o'clock.

IS YOUR NAME ENTERED THERE?

Attention of Blairmore citizens is again drawn to the necessity of registering their names on the town and school voters' lists. Section 188 of the Towns and Villages Act provides for the inclusion in the voters list of the following:

All tenants who have rented an assessed parcel for a period of 12 months immediately preceding the last day of August of this year, and the wife, husband, father, mother and every son and daughter of any person whose name appears upon the assessment roll and tenants' voters' list are entitled to be placed upon the said voters' list—

(a) If he or she is a resident within the town, or assists in a business in respect of which said person is taxable; and

(b) If he or she is of the full age of twenty-one years; and

(c) If his or her name does not already appear on the roll; and

(d) If he or she duly makes application in accordance with the regulations.

Remember, municipal and school elections are in the offing; and October 31st is your last opportunity to register.

THE UNGODLY PRESS

Sunday afternoon, Hon. William Aberhart resumed his attacks on "The Yellow Press," which he denounced as "polluted, ungodly, yellow stuff," and added that children should be prevented from reading the "immoral, untrue statements" contained in such papers.

Just what brought on this virulent attack of premeditation was not explained. In all probability it was due to recent criticism directed against Mr. Aberhart's credit house project.

The choice of language used by Alberta's premier is not the kind that will instill respect for him in the many thousands of Albertans who daily and weekly read their favorite newspapers. The average editor makes no protestations regarding his godliness, his morality or his veracity, preferring to allow public opinion to determine for itself what type of man presides at the editorial desk. On the other hand, Mr. Aberhart stresses his own personal Christian life. He has set himself up as one of the Elect—a one hundred per cent Christian whose prayers are heard and answered. Like Caesar's wife, he is above suspicion and, therefore, can malign and libel all who disagree with him—Drumheller Plaindealer.

The diet for a day for Pang, Husky pup brought from the north by the R. M. S. Narcople, consists of half a pound of beef, one pound real meat, one pair socks, one chunk of barley, one piece of calico rug, half a type-writer ribbon, one bottle of beer, a sweater sleeve, biscuits and bread.

FRIDAY, NOVEMBER 11, REMEMBRANCE DAY

Poignant reminders of those splendid days of glory and of grieving, "Poppy Day" once more recurs to prompt the citizens of this country in the duties they have inherited from the past generation. To Canadian youth in the year of grace, the deep-red petals of the Poppy may not carry the same significance they bore to the youth of twenty years ago. The Symbolism of sacrifice with which the Poppy has become charged is something to which the present generation succeeds only through the wistful memories of the aging men who fought their country's battles, who suffered privations, endured long agonies and finally triumphed amid surroundings carpeted with Poppies.

To wear this humble emblem on Poppy Day is to proclaim that amid all the jangling confusion through which this country is striving valiantly to penetrate, the heart and mind are nevertheless attuned to a sense of homage due to those men whose peace inspired 600,000 Canadians to offer themselves for service between 1914 and 1918; of which number more than 60,000 found graves in France and Belgium. It is over these graves that the Poppy blows in perennial bloom.

The numbered dead were not strangers. They were young Canadians, some of them well known in this community, filled even as the youth of today are filled, with the joy of living. So also were the 170,000 men who in 1938 bear upon their bodies the marks and scars of war; the disabled ex-service men who suffered disablement on behalf of Canada.

To manifest that proud recognition of their place in this country; to mark that tribute which is their due, Poppy Day has been set aside in order that all may join in recalling the Great Sorrow.

The blood-red emblems distributed throughout Canada by the Canadian Legion's vast volunteer organization are the product of disabled veterans—men striving to maintain themselves in the Vetrecof Industries administered by the Dominion government. To purchase a Poppy is a small thing. For every citizen to do so is a big thing. Let us all "Wear a Poppy on Poppy Day."

REPLACE ALBERTA HIGHWAY BRIDGES

Greater safety is to be provided by the provincial public works department in regard to bridges on highways in this province, according to information received by officials of the Alberta Motor Association.

On the Jasper highway, it is learned, the province proposes to replace all old bridges with new frame structures. A start has been made already in carrying out this policy.

At Pailis, where a fatal accident occurred last August, resulting in the death of a woman and serious injuries to the two other occupants of the car, which after skidding in the gravel at the approach, crashed through the railing into a ravine 30 feet below, a new bridge is being erected.

Estimates passed by the provincial legislature last spring provided \$35,000 for the construction of new bridges, while over \$200,000 was voted for bridge maintenance purposes.

Providing that weather conditions remain satisfactory, the public works department expects to have many of the bridges put in much safer condition for motor traffic purposes, thus reducing the accident toll in this province.

The Calgary Power Co. have doubled the candle power of lights in the two main business blocks at Pincher Creek without charge, at the request of the town authorities.

SPEED OF AIRCRAFT LIMITED—WELL, TO 650 MILES AN HOUR

If any aeronautical expert can demonstrate an aircraft which will better 650 miles an hour, A. E. Parker, contributor to Flight, the official organ of the Royal Aero Club, would like to meet him. The English writer claims no aircraft will ever be able to fly faster than the 650 mark and deduces the statement from an elaborate mathematical calculation, at the same time asking for opinions of other contributors.

He bases his calculation on the action of an air screw on the air through which it propels the airplane. He argues that the pressure of the air in front of the air screw is less than normal atmospheric pressure, and hence that "an airplane as it flies is preceded by a wave of reduced pressure."

He then uses mathematics to prove that the maximum speed with which a wave of pressure can travel through air is the speed of a sound-wave, that is, 760 m.p.h. This, he says, is indicated as the absolute maximum speed of an air screw-driven aircraft. The highest practical speed he rates much lower, from 600 to 650 m.p.h. The best form for a high-speed airplane, he says, would be a flying wing with the engines "buried" in the wing.

If those calculations hold good, then the time when the airplane will have reached the limit of its speed may not be far off. The world's airplane record speed, set up by Italian Lieutenant Francesco Agello in 1934, is 440.23 miles an hour. It is probable that this could be surpassed by a specially-built racing plane today.

Fastest transport aircraft in use today are the Lockheed 14's, to which numerous of the European and British air lines are turning for long hops where speed and safety are first consideration. Howard Hughes chose one for his record globe-gridding flight earlier this year, and Canadians are proud possessors of ten of these luxurious passenger monoplanes. Cruising easily at 200 miles an hour, the silver-winged machines of Trans-Canada Air Lines daily span the continent from Vancouver to Montreal, their large cargo compartments containing express and mail, and covering the long stretch from the Pacific to the Atlantic in less than 20 hours.

WARNING TO POSTMASTERS AND BUSINESS PEOPLE

The district director of postal service sends out a warning from Calgary to the effect that a number of persons have recently been convicted at Vancouver in connection with the forging and uttering of postal money orders, the mode of operation used being as follows:

A money order was purchased for a few cents, the safety margin figures being then completely removed and the amount obliterated by a chemical. The orders being then raised to various amounts of \$20 or more.

In order to avoid loss on your part, do not cash money orders from which the safety margin figures have been removed, and do not cash money orders for strangers unless they are fully identified.

Such warnings have been sent out to postmasters, bank managers and business houses. Considerable damage was done the residence of Mike Marcial by fire on Sunday night, which was believed to have originated in the basement. Firemen were called and responded quickly. It took considerable time to extinguish the flames, which had crept up the outer walls between joists. In combating the flames, one volunteer fighter became suffocated and fell, injuring his head, necessitating his removal to hospital, where he remained for two days and is now able to be around.

"Serve the Church that the Church May Serve You."

CENTRAL UNITED CHURCH BLAIRMORE

Rev. E. B. Arrol, B.A., Minister

Sunday services—
11.00 a.m., Senior school.
2.00 p.m., Junior school.
7.30 p.m., Public Worship.
Wednesdays, 8 p.m., Prayer service.

ST. LUKE'S CHURCH NOTES

Rev. J. R. Hagie, Rector

Services Sunday next:
10.00 a.m.—Sunday School.
11 a.m., Morning service.

REGULAR BAPTISTS

Pastor J. W. MacDonald, Minister

In the Union Hall.

Services Sunday next:
11 a.m.—Senior and Junior Sunday school.

7.30 p.m.—Evening service.

Thursday, 7.30 p.m.—Prayer and Bible study.

You are cordially invited to our services.

SALVATION ARMY — COLEMAN

Capt. and Mrs. F. Hewitt in charge

Sunday services: Directory class at 10.30 a.m. Sunday school 5 p.m. Salvation meeting 7.30 p.m. Come and enjoy an hour in God's house.

Monday at 7 p.m.: Y. P. League.

Tuesday, 7 p.m.: Home League, all ladies are heartily invited to attend.

Friday, 7 p.m.: Young people's meeting.

CHURCH OF THE NAZARENE

Main Street West, Coleman

Pastor, Rev. C. Helen Mooshian, B. A.; assistant and organist, Gunnell Berglund. Sunday services—

Sunday school at 11 a.m.

Morning worship at 12 noon.

Evangelistic service at 7.30 p.m.

Tuesdays, 7.30 p.m., Prayer Meeting.

Fridays, 7.30 p.m., Bible Study.

Strangers and visitors always welcome.

LEGEND OF MONTCALM

IN C.B.C. BROADCAST

Around the scarlet dragon, blazoned on the snuffbox of the gallant Marquis de Montcalm, is woven "The Dragon from the Sea," sixth play of the C.B.C.'s dramatic series, "The Building of Canada," to be heard on Wednesday, November 2nd, at 10.30 p.m. C.S.T., and 9.30 p.m. M.S.T.

On a summer day of 1759, Montcalm, defender of Quebec, told a child the legend of his dragon, the knight, and the princess chained to a rock. On that day the legend became a reality, as the sea power of England closed in about the rock of Quebec and Montcalm began his heroic struggle with Wolfe's red-coated army. Against the background of siege and battle is played the private drama of Major Rene Morel, Montcalm's friend; his lovely wife, Julie, and little Louise, who will play many parts in future chapters of "The Building of Canada."

LOBO'S AMATEUR HOUR

IS DEVELOPING INTEREST

Much interest locally is being centered in "Lobo's Amateur Hour," to be staged at Cole's theatre, Bellevue, on Monday and Tuesday next. A splendid programme is promised. See ad elsewhere in this issue.

Lobo's Amateur Hour
will be held at
BELLEVUE THEATRE
OCT. 31 - NOV. 1
SINGERS, DANCERS,
IMITATORS, MUSICIANS,
DRAMATIC ACTORS,
ACROBATS,
and all other talented entertainers will be accepted.
The outstanding artist and suitable type will be submitted to Warner Brothers' talent scout, Hollywood, and to the 20th Century Fox Film talent representative, New York; and the radio station and troupe. All applications forms received in this district will be filed in Lobo's Artists' Bureau, Vancouver, B.C. Application for this audition is absolutely free. Forms obtainable at Coleman theatre, Blairmore theatre and Bellevue theatre ticket offices.
Different Prizes and Different Artists Each Night.
Adm. Adults 40c, Children 25c. Performers Free

MILD, COOL AND SLOW-BURNING—THAT'S DIXIE!

The Plight Of Youth

The phenomenon of young, unemployed men in large numbers wandering aimlessly all over the country in the past two or three months, some of them honestly looking for work and others professing searching for jobs but hoping to avoid them, has been termed, and not without warrant, a "national disgrace."

There cannot but be sympathy for these youths. Many of them are offspring of thrifty, hard-working parents. Many of them are fairly well educated, some even holding university degrees. Some of them are well equipped to occupy an honored place in the business and social life of the country and have the right attitude towards work, but they find that industry does not want them, has no place in its crowded ranks where they can fit in.

On the other hand, the ranks of these idle, footloose youth include some who are more shifty than thrifty, some who prefer to shirk rather than work, and some who are outright morose and ne'er-do-wells. Unfortunately, in the minds of a section of the general public, there is an inclination to include all of them in the latter category, and this tends to make the lot of those who are willing and eager to work and who are unable to do so through no fault of their own, harder to bear.

Unless something is done to enable these young men to find their place in the social and business life of the country, and particularly those who by upbringing, education and inclination are worthy material for citizenship, their ultimate fate is difficult to predict, beyond the general statement that it can hardly be expected to be creditable for themselves, their forbears or their country.

Action Is Needed

As stated at the outset, one cannot help but be sympathetic towards these youth and grieved at the predicament in which they find themselves, but sympathy alone is not sufficient. Sympathy must be translated into practical action if mental, moral and physical disaster is not to be the goal towards which they press. In other words, a helping hand must be extended, not by private effort, but by the governments of the country.

On the face of it the problem seems insoluble until such times as industry has sufficiently recovered from the slings and arrows of misfortune to enable it to absorb them. The only other solution, temporary or otherwise, is for the governments of the country to do something more than is now being done.

It will be argued, of course, that in the west, the federal government has made some provision to take care of these benighted youth by establishing the farm bonus plan and in providing the funds for the operation of youth training classes in the larger centres.

The former has undoubtedly will again be of some assistance in aiding unfortunate youths but the farm bonus plan, after all, is only a seasonal and very temporary measure. It takes care for a few months of the year of one class of the unemployed young men and only a percentage of the total. Moreover, it does not ordinarily train for or lead in the direction of permanent employment for the great majority of its beneficiaries.

The youth training project, too, has undoubted merits. The educational opportunity it affords is excellent and unquestionably those who attend these classes and pursue their studies with diligence, thereby better equip themselves to occupy a place in industry if and when the opportunity to do so appears, but unfortunately it does not, at present, lead to self-support, the natural ambition of every right-minded youth.

Abundant Opportunity

All that youth training does, as yet, is to increase the number who are equipped to compete for the few vacancies that occur in industrial life at a period when trade and commerce, using the term in its broadest sense, has not emerged from the doldrums.

Until such time as industry is able to more adequately provide for the needs and ambitions of the youth of the country it would appear that the only thing for the senior governments to do is to make some provision to enable youth to give vent to its energies in the natural and proper manner through work, and this can best and most profitably be done through the development of the vast natural resources in which the country abounds.

One could list a number of projects which might be undertaken, the prosecution of which would restore moral tone and physical vigor to disappointed youth and at the same time yield some return to the taxpayers who would have to foot the bill. It is hardly necessary to enumerate such development possibilities. One has only to look around and see the opportunities.

There is plenty of work of a beneficial nature to be done and there are plenty to do it. Why not connect the two?

Had Right Answer

"James," said the teacher, "come in front of the class and spell 'neighbor'!"—and he did so correctly. "That's quite right, James!" said the teacher. "Now, Tommy, it's your turn. Please tell me what a 'neighbor' is."

After a pause, "Please, miss," said Tommy, "a neighbor is a woman who borrows things."

A bottle of water, standing outside a California house in 1931, focused the sun's rays' with such intensity that the wooden wall was ignited.

HOW YOU CAN ATTRACT MEN

Don't let love and romance pass you by. Men like girls who love of pep and energy. So start taking Time-tested Lydia E. Pinkham's Vegetable Compound, made especially for women from whom health and vigor, help Nature lose up your system and give you more pep to enjoy life.

For over 60 years one woman has told another how to get "smiling thrills" derived from Lydia E. Pinkham's Vegetable Compound. Let it help YOU!

Campaign For Conscription

Preparations In Britain To Be Ready In Event Of War

Sir Auckland Geddes, war-time minister of national service, appealed for re-establishment of a government office similar to the one he headed during the Great War, to ensure mobilization of the population for a total war within a few months after the outbreak of a new conflict.

In a letter to The Times, Sir Auckland suggested submission of a simple questionnaire to all British voters to determine their reaction to his proposal, which received the editorial support of The Times.

Viscount Rothermere's Daily Mail intensified its efforts to obtain replies from its readers to a questionnaire asking: "Are you in favor of obligatory military service or organization of a volunteer service?"

Lord Beaverbrook's Daily Express also continued its campaign for conscription of the nation's economic and man-power resources, citing the statement of Frank Fehr, president of the Baltic exchange—one of the world's greater grain markets—in favor of conscription of men for the army and also for industrial and commercial enterprises.

Mr. Fehr said officials of the Baltic exchange were disposed to see their entire organization placed at the disposition of the government.

Something New In Food

Ginger Bread With Buttermilk Said To Be Fine Combination

The columnist of the Baltimore Sun, writes one of his contemporaries, the other day remarked he had found what he called a new food combination recently—buttermilk and ginger bread.

"That is a food combination the origin of which would be hard to determine," says the columnist, "but I know it was a very popular combination constantly indulged in on the eastern shore of Maryland from time immemorial. The habit probably drifted down from Pennsylvania, for in every lower Pennsylvania home it is considered one of the best food combinations there ever was."

"Out in Carroll county no farmer's wife would think of offering you buttermilk without a slice of ginger bread with it—and if ever there was a combination that could charm away the torments of a hot day it is a glass of buttermilk right cold out of the springhouse and a hunk of ginger bread made by the old-fashioned method descended to Maryland housewives from the angels. Try it some time on a hot day after a long, tiring walk."

SELECTED RECIPES

MARMALADE BAVARIAN

1 package Orange Jell-O
1 1/2 cups hot water
1/2 teaspoon salt
1/2 cup heavy cream
1/2 cup orange marmalade
Dissolve Jell-O in hot water. Add salt. Chill until cold and syrupy. Fold in cream, whipped only until thick and shiny, but not stiff. Fold in marmalade. Chill until slightly thickened. Turn into mold. Chill until firm. Unmold. Garnish with whipped cream and additional orange marmalade. Serves six.

CANDIED COTTAGE ROLL

4 lbs. cottage roll
Boiling water
1 tablespoon mustard
Vinegar
Sifted cracker crumbs
Whole cloves
1/2 to 3/4 cup Bee Hive Golden Corn Syrup
Steamer cottage roll in gently boiling water until tender. Cook the liquid in which it was cooked, then drain. Remove strings. Place cooked cottage roll on rack in roasting pan. Smooth mustard to a paste with vinegar, and spread over fat surface of roll. Cover with sifted cracker crumbs, score in diamonds and centre each diamond with a clove. Pour corn syrup carefully over the surface. Place in a hot oven, 400 degrees F. to re-heat meat and to glaze surface. Baste carefully once or twice during cooking with liquid in pan.

The English Translation

A Chinese landed in England for the first time. At a dinner an official asked him his name.

"Sneeze," replied the Oriental.

The customs officer stared hard at him.

"Is that your native name?" he asked.

"No," The Chinese shook his head. "I had it translated into English."

"Then let's have your native name," persisted the officer.

"Ah Choo it is," replied the other.

Not What He Wanted

Bruno Anton, earning \$5,500 a year as chef in a London West End restaurant, was an ardent Nazi chief in London, but the last thing he really desired was to return to Germany.

The other day he was recommended for deportation to his Fatherland.

Istanbul, Turkey, may ban names for streets and substitute numbers.

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums, aids digestion, relieves toothache, and helps keep you healthy!

Take some home for the children too—they will love it!

Hermit Cell

Site Of Historic Cell Is Found In Westminster Abbey

The site of the cell of the famous "Hermit of Westminster," credited with an important role in the history of the early Tudor kings, was believed discovered in Westminster Abbey.

Lawrence E. Tanner, keeper of the Monuments and Library of the Abbey, disclosed that during spring cleaning he found a window and a door near the Pooley Corner of the Abbey.

The door had been locked for an unknown number of years, but Tanner concluded from old records that it led inside to a cell in which an elderly monk or holy man lived in retirement. No trace of the cell remains.

Tanner said Henry V. probably passed through that door the night his father, Henry IV, died, March 20, 1413, and may have spent the night there with the hermit, who was given credit for reforming the young king. (According to the Shakespearean story, Henry V. was a wild young man before his accession, the companion of Falstaff and other disreputable characters. After his father's death he became one of England's ablest kings.)

Prison With A History

The Tombs On Manhattan Island Is Offered For Sale

Manhattan Island's saddest spot—the place where criminals have been punished for 300 years—is for sale. The city announced that the prison called "The Tombs" and the criminal courts building—both atrocious specimens of architecture—and the land on which they stand are for sale.

The price will be \$1,850,000. The ground on which the buildings stand once was the holiest place on the island. When Hendrick Hudson came in 1609 the spot was covered by a beautiful pond, fringed with mighty trees. The Dutch called the pond Kolch, meaning fresh water.

Like the Dutch, the English used the pond as a winter skating place. When the young Duke of Clarence, who later was to be King William IV, was a midshipman fighting George Washington's revolutionaries, he fell through the ice of that pond.

But the pond was more than happy. On its shore the Dutch erected a gibbet. The English, too, used the spot for hangings. Americans, in 1830, followed precedent by draining the pond and building a prison. Because of its Egyptian-style architecture, the public called it The Tombs.

Another Silk Substitute

New Textile Fibre Is Said To Be Actually Run-Proof

Japan is having trouble selling enough goods abroad to finance her imports of munitions for war and for necessities. Now her best supplier threatens to reduce her main export, which is silk.

From the laboratories of the main rayon manufacturer in the United States there is news of the perfecting of a revolutionary textile fibre. It is declared to be entirely different from rayon or anything else now on the market, and is so strong and elastic that really run-proof stockings will presently be an actuality. Thus, the new fibre may replace real silk in its own great remaining market, hosiery—Brandon Sun.

Payments To Pensioners

At the end of September a total of 98,037 cheques were being issued monthly to pensioners of the Great War. This represented a total annual expenditure of \$40,442,626. Manitoba has 8,495 pensioners receiving \$3,225,154.

Clerk: "May I have the afternoon off to go shopping with my wife?"

Boss: "No."

Clerk: "Thanks."

The whippet is said to be the fastest thing on legs. This dog can travel 200 yards in from 10 to 12 seconds.

The curvature of the earth amounts to seven inches per mile.

Outspeeds Howitzer Shell

Eyston Believes His Record Of Value To Car Designing

Captain George E. T. Eyston, who set the land record of 357.5 miles an hour in his seven-ton automobile, Thunderbolt, told some 200 members of the Downtown Athletic Club in New York about travelling faster than the shell of a field howitzer.

Introduced by Captain E. V. Rickenbacker, chairman of the contest board of the American Automobile Association, which timed Captain Eyston's runs on the Bonneville Salt Flats in Utah, and president of Eastern Air Lines, the British speed driver said that he believed record-breaking in specialized machines was of great value to the advancement of general automobile design from the points of view both of safety and efficiency.

"Tires able to withstand six miles a minute," he said, "prove that tires can be built which will not blow out at ordinary road speeds. Finer steels and light aluminum alloys are the precise workmanship which go into the construction of such a machine as the Thunderbolt with its 4,000 horsepower inevitably make advances for the motor car intended for the average driver."

After describing how his machine was started by being pushed by a truck just to get the huge engines turning over, and how the change was made from second gear to top gear at a little over 200 miles an hour, Captain Eyston said that when the machine attained its top velocity the eight 48-inch wheels were revolving forty-five times a second. Speed reached, he added, 550 feet a second, compares with 700 feet a second for the bullet of a .45 calibre revolver and about 400 feet for a howitzer shell.

"During the runs," he said, "the Thunderbolt gives off a streamer of black smoke about three and a half miles long. It passes the timing observers, with their electric eyes, simply as a 'swish.' Sound of its passing follows about half a mile behind."

Something Really New

Paper Pillow Cases Protect Sleeper Allergic To Feathers

Here's another wrinkle for keeping down washing. The New York Herald-Tribune tells of something new in houses; the housewife's dream comes true, in short.

"Did you know that you can have pillow cases for as little as 10 cents apiece, if you'll use paper ones? They are as soft as face tissues but heavier and stronger. We have actually kept on the same one for a full week. These paper pillow cases really came to light as a protection for those unfortunate allergic to feathers. No odor or dust particles from the pillow can penetrate through them. But many a person not allergic to feathers will welcome them for nights when an extra layer of face cream or an all-night scalp treatment warrants special pillow protection."

Old Castle Wall Found

The foundations of a wall believed to be 600 years old were discovered by workmen digging a trench to lay pipe to the guardroom of Windsor Castle. It is more than 600 feet long, the brickwork is in excellent preservation, and it was drilled through with difficulty.

How Kangaroo Was Named

The kangaroo was named through a misunderstanding. In 1770, Captain Cook asked a native the name of the animal and the native replied "kan ga roo," meaning "I don't understand." Cook thought it was the name of the animal.

There are 3,300 species of fish in the waters of North America.

A barrel cactus is more than 90 per cent. water.

I sweeten my morning cereal with BEEHIVE Syrup because it is better for me.

Oil On Ocean Bed

Canadian Coal Seekers Have Found Petroleum 2,300 Feet Down

What is believed to be the first submarine oil bed in the world has been found at Inverness, Nova Scotia. A diamond core seeking new coal seams in a government-operated colliery came across flowing oil a mile from the mainland and 2,300 feet vertically below the sea surface. The crew had penetrated 235 feet horizontally in coarse sandstone formation when they found droplets of oil and water.

Confirming the find, Dr. Alan Cameron, provincial deputy minister of mines, said: "We're going to carry the drill hole on further. According to the geologist and engineer there are definite showings of oil. If it is petroleum, it will be hard to get it."

Baby Panda Likes Frost

Fet At Chicago Zoo Does Tricks Only On Cool Days

Mei-mei, the Chinese baby panda, was a disappointment to Brookfield Zoo authorities in Chicago because she would not play up to her public like her predecessor, the late Su-su. Then came the season's first really cool day, so cool in fact that many persons huddled fireplaces instead of going to the zoo—and Mei-mei showed her first interest in playing and people. Mei-mei frisked and rolled, climbed and wiggled her nose at the few overcoated spectators, while nearby baby gorillas went into a huddle and shivered.

Assistant Director Robert Bean is trying to figure out how to get Mei-mei and the public on an equal interest basis.

A Freak Potato

Ohio Woman Has One Displaying Human And Animal Faces

A freak potato, weighing two pounds and consisting of three branches, was found by Mrs. Marie Davis of Toledo, Ohio, in a bushel of potatoes she received from her sister's farm.

One of the potato's branches resembles an old woman with a bunch of hair knotted on the back of her head, and, turned at another angle, shows the likeness of a human face. Another branch looks like a rhinoceros' head and a third branch like a human face looking down.

England's first coffee house was opened in St. Michael's Alley, London, 1652.

It is possible to see an eclipsed moon while the sun is visible.

AN APPEAL FOR ANGLO-GERMAN CO-OPERATION

Clacton-on-Sea, England.—Sir Samuel Hoare appealed for Anglo-German co-operation to "fill up the trenches which have been dividing Europe." At the same time he gave the government's pledge Great Britain would speed its rearmament and turn the United Kingdom into a fortress against air attack.

The home secretary, addressing a National government meeting here, defended Britain's preparations for war as based not on a distrust of Chancellor Hitler's "peaceful aspirations," but by the fear a successor to Hitler may not hold the chancellor's views on the need for amity between Britain and the reich.

"Without friendly relations between England and Germany," the home secretary declared, "there can be no stable peace in the world."

The cabinet minister disclosed plans would soon be announced to make the civilian "home front as ready for action as any fighting service."

A vast campaign, he promised, would be set in motion to provide anti-aircraft equipment, build up the air force, assure effective distribution of gas masks and create a system of trench refuges to make Britain impregnable against a "knockout blow from the air."

This tremendous national effort, the home secretary added, would be "founded upon British character, British corporate organization, British institutions, including the British preference for voluntary service."

Sir Samuel came vigorously to the defence of the Munich declaration signed by Hitler and Prime Minister Chamberlain which cast out war as a means of settling Anglo-German differences.

"Our critics declare that these are idle words and that you cannot believe the pledges of the German Führer," the home secretary said after reading the text of the peace declaration.

"I refuse to accept this view. I believe Herr Hitler, having met our prime minister and having freely discussed with him, man to man, the questions which may divide our two countries, means what he says."

"I know that those who do not take my view point to occasion when having declared the use of force, he (Hitler) has yet had recourse to it. I admit these instances inevitably give us cause for anxiety. None the less, I am convinced that friendly relations with England have always been a cardinal point in Herr Hitler's policy. And I am also convinced that without friendly relations between England and Germany there can be no stable peace in the world."

Sir Samuel recalled that he, on behalf of the British government, signed the Anglo-German naval agreement which Hitler had kept in its letter and in its spirit.

"Here indeed is a concrete fact that entitles me to attach the greatest importance to the declaration made by Herr Hitler and Mr. Chamberlain," Sir Samuel declared. "Here indeed is a concrete fact that convinces me that with patience, with restraint and readiness to understand our respective points of view, it is possible to fill up the trenches that have been dividing Europe into hostile camps and once again create a comity of nations upon which a stable peace can be restored to suffering humanity."

Annual Spring Shows

Dates For Western Canada Have Been Announced By Secretary

Saskatoon.—Dates of the annual spring shows for western Canada have been announced by Sid W. Johns, secretary of the Western Canada Association of Exhibitions. The dates follow:

Brandon, week of March 13; Saskatoon, week of March 20; Regina, week of March 27; Calgary, week of April 3, and Edmonton, week of April 10.

Endorses Czech Plan

Winnipeg.—Mayor John Queen, of Winnipeg, heartily endorsed proposals to settle Czechoslovakian refugees in Canada. "I think Canada and all other civilized countries should do all they can to provide asylum for these people," he said.

No Tugs Required

New York.—The Queen Mary, largest ship afloat, docked last week—in perfect weather—under her own power because of the New York harbor tugboat strike. The liner brought 1,401 passengers and \$25,000,000 in gold from Europe.

To Establish Peace

Says Democratic And Dictator Countries Should Bury Differences

London.—Joseph Kennedy, United States ambassador to Great Britain, declared that democratic and dictatorial countries should bury their differences and seek to re-establish good relations in a world threatened with disaster from a mad armament race.

Speaking at the annual Trafalgar Day dinner of the Navy League, Mr. Kennedy praised Prime Minister Chamberlain's "all but superhuman efforts in behalf of peace" in the recent crisis. He said, however, that "only history will show whether or not he made the right decision."

In the light of that crisis, Mr. Kennedy said, "it is hard to quarrel with the decision of any nation to build up its military forces; in fact we can only commend such action on the part of those sincerely committed to a policy of peace."

But he expressed the belief that the armaments burden was approaching the point "where it threatens sooner or later to engulf us all in a major disaster," and "for this reason the American people look forward to the day when the nations of the world will realize they must agree upon limitation and reduction of armaments."

The ambassador declared it had long been his theory that it was "unproductive for both democratic and dictatorial countries to widen the division existing between them by emphasizing their differences, which are self-apparent."

"Instead of hammering away at what are regarded as irreconcilables they would advantageously bend their energies toward solving their common problems and attempt to re-establish good relations on a world basis."

May Call Parliament Early

To Make Prorogation Possible Before King and Queen Arrive

Ottawa.—While no definite decision has been reached, Rt. Hon. Ernest Lapointe, minister of justice and acting prime minister, disclosed the government had been considering the possibility of calling parliament before Christmas.

It would not be a "fall session," the minister explained, but, in view of the visit of the King and Queen to Canada early next summer, it might be deemed advisable to have the regular session called before Christmas so prorogation could be reached earlier than usual.

Customarily, parliament is called in January or February for the annual session. For some time there has been a report a special fall session or early assembly of the regular session would be called to deal with the Canada-United States trade agreement now being revised at Washington.

Mr. Lapointe did not say the trade agreement had entered into the government's consideration in connection with a possible early session. He said there was no news to indicate when the agreement would be ready for signing.

Interviewed after the "regular" weekly cabinet council, the acting prime minister said it would be desirable to have parliament prorogued before the King and Queen came to Canada. If parliament meets this fall it will probably be late in November.

Canada's First Entry

Saskatchewan, Man Exhibiting Alfa Seed At Chicago's 1938 Show

Chicago.—Canada's first entry for the 1938 International Grain and Hay Show here Nov. 26-Dec. 3 was made last week by H. A. Myers, a Saskatchewan grower. The show is held in connection with the "International Livestock Exhibition. Myers will exhibit samples of alfalfa seed, grown this year on his farm near White Fox.

Receives Decoration

Col. Charles Lindbergh Presented With Order of German Eagle

Berlin.—Col. Charles A. Lindbergh received one of Germany's highest decorations—the Order of the German Eagle—in an unceremonious presentation Tuesday by Field Marshal Hermann Goering.

The decoration came at a reception Hugh Wilson, United States ambassador, gave in honor of Lindbergh and Goering.

As Goering passed down the receiving line he paused when he came to Lindbergh, telling him he had orders from Reichsführer Hitler to give him the decoration as a token of Germany's esteem of what Lindbergh had done for aviation.

The American aviator replied with a simple "thank you" and hung the decoration around his neck without any of the usual ceremonies attending bestowal of the honor.

REPORT MOISTURE CONDITIONS IN THE WEST AS VARIABLE

Winnipeg.—Autumn sub-soil moisture conditions, on which the farmer usually pins his hopes for next year's crop, range from poor to excellent over the three prairie provinces, a survey shows. Saskatchewan and Alberta reported conditions fairly promising but Manitoba farmers generally considered the outlook unfavorable at the moment.

However, appearance of soaking rains behind frost strikes and plenty of moisture during next spring and in the growing season will alter the Manitoba picture.

Weather bureau officials said the records of precipitation by inches from Sept. 1 showed Saskatchewan so far with 1.90, Alberta 1.75 and Manitoba with .36, far below normal.

Grain firms also reported Manitoba wheat lands suffering from a late summer and fall dry spell. The Seale Grain Company, Limited, in a review of August and September, described the Manitoba situation as 57 per cent of normal, Saskatchewan 98 and Alberta 93.

Saskatchewan government officials said the situation ran from good to excellent, with one poor spot in the extreme southeast. Part of the province where few rains have occurred since the harvest. Alberta authorities, preparing a sub-soil moisture survey for release Nov. 1, described conditions as fair to favorable.

Manitoba farmers in areas just south of Winnipeg declared the soil was so dry they were unable to accomplish fall plowing properly. For more than a foot beneath the surface at some points the earth held no moisture.

"There is a distinct below-normal moisture condition in Manitoba this fall," Hon. D. L. Campbell, Manitoba minister of agriculture, said. "I consider that one of the biggest single factors in the next year's crop is moisture we get the fall before."

Storing up reserve moisture acts like a bank account in any other business. "Manitoba lacks that reserve moisture and is more than usually dependent on next spring elements. The lack of moisture this fall doesn't mean we can't get a crop next year. The crop will come along providing we get satisfactory weather conditions during the spring and growing season."

Mr. Campbell, who said he was like every other farmer who believed crops never come up to expectations, declared the condition of the land this fall was distinctly below the long-time average. Good fall rains after Oct. 20 were not very beneficial as freeze-up usually had set in and moisture could not seep into the earth.

FIRST HONORS TO CANADA

The team from Ontario Agricultural College, Guelph, which won first place in a field of twenty-six in the Collegiate Dairy Cattle Judging contest at the National Dairy Show held at Columbus, Ohio. The team made a total of 5,371.9 points out of a possible 6,000 in the judging of all breeds of cattle. Three weeks earlier, at the Eastern States Exposition at Springfield, Mass., the same team won the major honors from eleven United States colleges. Right to left: Prof. G. E. Rathbun of the O.A.C.; B. S. Beer, F. J. Archibald, G. R. Bagg and L. T. Sonley.

ASKS DUCES' LENIENCY

Italy's decrees against Jews might have serious repercussions in the United States, Supreme Court Justice Salvatore A. Cotillo (above) in New York cabled Premier Mussolini, requesting an audience before the decrees go into effect. Cotillo, son of Italian immigrants, is a Knight Commander of the Crown of Italy.

May Visit Callander

Dr. Dafoe Is Hoping Royal Visitors Will See The Quilts

Toronto.—Dr. Allan R. Dafoe, Ontario quiltmaster physicist and diarist, said he "hoped" King George and Queen Elizabeth would be able to visit the five kiddies at Callander during their visit to Canada next year.

"We hope that when the arrangements are made for the royal itinerary," the doctor said on his arrival from Buffalo, "a stop may be included at North Bay on either the westbound or return journey, to enable the King and Queen to come and see the quilts at Callander."

"Speaking in Buffalo, in humorous vein, I said that while ordinary people went to see the King, the King would have to come to see the quilts. No disrespect was intended and I am sure their majesties would be the first to appreciate the impossibility of bringing the children to them."

First Line Of Defence

Says Newfoundland Is Bulwark Against Air Raids

Toronto.—Canada's first line of defence against air invasion is Newfoundland, Sir Alfred Morine, K.C., former minister of justice in Newfoundland, told the young men's section of the Toronto Board of Trade. Should a foreign navy capture Newfoundland it would be provided with an air base from which to send raids against cities along the St. Lawrence River, Sir Alfred said.

Federal Aid For Fire Sufferers

Ottawa.—Federal grants of \$25,000 to the Canadian Red Cross to aid the fire sufferers in the Fort Frances district of northwestern Ontario and of \$15,000 to the municipality of St. Luc de Matane, Quebec, recently damaged by fire, were announced by Hon. Ernest Lapointe, acting prime minister.

Record For German Plane

Berlin.—The German mail plane Nordstern claimed the record for the fastest trans-Atlantic crossing between New York and the Azores, landing at Horta after 11 hours and 33 minutes of flight at an average speed of 324 kilometres (201.32 miles) an hour, D.N.B., official news agency, announced.

Would Halt Arms Race

Report That Prime Minister Chamberlain May Consult With Hitler

London.—Havas News Agency said it was reported in government circles that before Prime Minister Chamberlain throws Great Britain's armaments machinery into high gear he will make a personal appeal to Chancellor Hitler for an arms limitation agreement.

In this connection, Havas noted, Sir Neville Henderson, British ambassador to Germany, left Berlin for London to spend about a week here.

The news agency added that if Mr. Chamberlain takes the initiative toward limitation talks with Hitler, his plea will probably concern land as well as air armaments; past experience has indicated only qualitative limitation of land armaments can be hoped for.

It is taken for granted in London, said Havas, that France and United States would support any move toward a halt in the arms race. United States Ambassador Joseph P. Kennedy, for an address to the Navy League, spoke in favor of limitation.

Food Ship For Spain

Canadian Aid American Farmers Gave 70,000 Bushels Of Wheat

Regina.—Gift of hundreds of Canadian and American farmers, 70,000 bushels of wheat starts for Spain aboard the Canadian-American food ship Erica Reed on Oct. 30 from New York. Besides wheat, the freighter will carry other food, clothing and medicines, donated by Canadians and Americans. The cargo will total 5,000 tons.

To speed the shipment, all will be loaded at New York, though originally it was intended the Canadian donations be shipped from Montreal.

BRITISH TROOPS SUBDUED ARABS TO ESTABLISH ORDER

Jerusalem.—Approximately 1,000 Coldstream Guards marched into the old city of Jerusalem and delivered the district from the hands of Arab rebels who had held it for four days. Wearing rubber-soled shoes for silencing their feet, the soldiers, in the old city through historic Damascus gate and almost immediately were met by a strong fusillade of rebel fire.

Within a few hours the troops had subdued the Arabs without loss of a British life. At least nine Arab rebels were killed, and 40 taken prisoner. Two British constables were wounded.

British authorities established complete law and order in the old city, which they had surrounded without attempting to enter. Silence hung over the quarter as the guards patrolled the streets.

The Christian and Jewish population showed intense relief as troops marched through the narrow, deserted streets to the mosque of Omar area, which they cordoned off.

"Riot and police then began a methodical house-to-house search of the district between the mosque and the old city walls. Local authorities distributed bread to the poor.

All male occupants of houses in the Bab Hutta quarter of the old city—about one-fifth of the total area—were examined by police for rifle butt marks on their shoulders in the same manner that Spanish soldiers in their civil war have examined civilian captives for evidence of having fought.

Many of the Arab band which had held control of the Moslem section seceded Tuesday night ahead of the British expedition.

Some slipped through subterranean tunnels, others by lowering themselves with ropes suspended on St. Stephen's gate.

Troops patrolled the main roads between Haila and Nazareth, Tiberias, Safed and Acre.

The Coldstream Guards marched into the old city shortly after a formal martial law was proclaimed throughout Palestine to aid 20,000 British soldiers in their attempt to crush the uprising of an estimated 10,000 tribesmen.

A UNITED FRONT URGED TO ASSIST WESTERN FARMER

Winnipeg.—Amalgamation of the United Grain Growers and the Manitoba Pool Elevators Limited, and eventually the Saskatchewan and Alberta Pool Elevators into a united co-operative front to assist western Canada agriculture was urged by Premier John Bracken of Manitoba.

"Co-operation among farmers and farm organizations offers more hope for the marketing of our products than any other method," the premier told 250 persons gathered at the Manitoba Pool Elevators' annual banquet here.

Mr. Bracken, who has called an international conference on marketing of western agriculture to be held in Winnipeg in December, said Canada's biggest and most difficult problem in years is the marketing of Canada's surplus products. It is not a problem of only western Canada but of all Canada, he said.

By the "marriage" of the United Grain Growers and the western wheat pools, Mr. Bracken said the three prairie provinces would have a "united farmers' voice" to deal with their problems, and with it a united approach in discussing difficulties with the federal government.

He pointed out that due to supply and demand, western wheat prices were down. Canadian wheat was selling at around 60 cents, 10 cents below the average for the depression years.

A solution, he said, was to tear down tariff barriers of world trade. These tariffs, Mr. Bracken asserted, were obstacles built up by war psychology in Europe, moves of overseas countries to grow their own products, which resulted in importers taking 250,000 bushels less export than they did eight years ago.

Mr. Bracken estimated exportable world wheat surplus would be 900,000,000 bushels while import needs were only 540,000,000 bushels.

F. F. Bredt, president of Manitoba Pool Elevators, in replying to Mr. Bracken, stated discussion had been under way with the U.G.G. and that he anticipated developments towards amalgamation. "There is more harmony in the Canadian wheat association than ever before," he said, and urged that the Manitoba premier "become best man" at the marriage of the U.G.G. and Manitoba Pools.

Er. E. Hayne, director of the United Grain Growers, urged closer relationship between the two bodies but refrained from mentioning amalgamation.

Donald Cameron of the University of Alberta extension department outlined need of adult education in Alberta.

Government Arsenal

Expense Of Establishing A Plant Would Have Been Too Great

Ottawa.—To have built a Dominion government arsenal capable of supplying Canada's munitions requirements would have cost between \$30,000,000 and \$35,000,000, the Davis firm, engineering and building the Bren gun contract was told.

Instead of making that investment, Major-General L. R. LaFleche, deputy minister of defence, said, the department obtained four million more munitions, 200 aircraft and generally improved Canada's defence works and forces.

"The other way," he said, "we would have had a moribund defence force and an arsenal."

Hon. Ian Mackenzie, minister of national defence, said there had been much consideration of policy and the government had decided to buy its main arms from a private manufacturer.

Shows Profit

Manitoba Pool Elevators Have Good Surplus

Winnipeg.—Net surplus of \$728,000 after paying operating expenses for the last year was shown by the directors' report considered at the annual meeting of Manitoba Pool Elevators, Ltd. Liquid working capital of the company is in excess of \$500,000 to reduce principal on terminal indebtedness \$56,000 was paid. Pool Elevators now own three terminals at the head of the lakes with total capacity of 4,525,000 bushels, the third one having been purchased at the beginning of the present crop year.

During the past season the company operated 155 country elevators in Manitoba. Total receipts amounted to \$1,200,000, slightly more than 27 per cent of all deliveries in Manitoba.

"READ A NEWSPAPER"

Readers of this paper will now have established the habit of looking for the messages conveyed in the weekly advertisements of the Calgary Daily Herald, appearing in The Enterprise. Each message is different. Each deals directly with some phase of current living, and each is a stimulus toward informed, progressive citizenship.

Naturally these messages bear largely on the value of a newspaper, as a source of information in the limitless field of human activities and aspirations. The Calgary Herald has established itself in leadership of public opinion. Its large staff of writers makes possible a complete coverage of province, city and district, and its telegraphic news from other parts of this continent and abroad is authentic and reliable. It has earned a reputation overseas as well as at home, as one of the most dependable dailies of Canada, presenting with accuracy the Alberta picture. The extension of service through the pithy thoughts contained in the weekly advertisements is appreciated by press and public.

BOYCOTT TACTICS REVIVED

Now that the treasury branches are supposed to be operating, it is interesting to watch the technique of the "social crediters" who are attempting to boost the scheme.

The same old tactics are being employed as when the prosperity certificates were in evidence.

Merchants are being waited upon by either paid propagandists or those interested in "social credit," and advised that unless they co-operate they will be boycotted by "social credit" customers.

When those interviewed are asked if they intend to accept vouchers and reply that they do not know what will be done, the reply invariably is, "Well, it is about time you did know."

Evidently there is some central organization from which these people get their instructions. It may be well for those over-enthusiastic persons to remember that a great many "social crediters" are employed by non-"social crediters," and by such tactics they are quite naturally doing an injustice to their friends.

It is about time that this method of endeavoring to put class against class was frowned down upon and people in business left to carry on their trade without being continually interfered with by those who have as they think "the cause" at heart.—Observer, in Calgary Herald.

Teacher: "Why was Adam created first?"

Pupil: "To give him a chance to say something."

Miss Mary Bower, R.N., graduate of the Holy Cross hospital, Calgary, who has been guest of her mother at Pincher Creek, left Wednesday to commence a postgraduate course at the Mayo clinic, Rochester.

Henry Victor Riviere, eldest son of Mr. and Mrs. Henry Riviere, of Pincher Creek, died suddenly of heart trouble at Wells, B.C., on October 16th, aged 39. He was at one time connected with the Mounted Police at Macleod. The remains were laid to rest at Wells.

NEWS FROM EDMONTON

(T. B. Windross)

Edmonton.—Signs interpreted by some as meaning that a federal election is not far away in Canada were seen in Edmonton during the past week, with visits by some national political leaders.

Hon. R. J. Manion was the first; he delivered two addresses in the provincial capital on his way to the coast, in his first western tour since he became national Conservative leader last July. Returning east, he stopped at Calgary. Following him came Hon. W. D. Herridge, brother-in-law and councillor of Rt. Hon. R. B. Bennett, and a sponsor for radical "reforms." He delivered no speeches on the prairies, however, and his mission remained something of a mystery.

On the same day, Hon. H. H. Stevens was in Edmonton. Their arrival at the same time, however, was declared a pure coincidence, and like his fellow "rebel" in the Conservative party, Mr. Stevens said he was here on private business only.

Then Hon. J. G. Gardner, federal minister of agriculture, appeared in Red Deer constituency and addressed a convention at Olds. Hon. Norman Rogers, federal minister of labor came to the province at the first of the week, to address a Liberal convention in Edmonton. At the same time, there were reports that other ministers from Ottawa might visit Alberta soon.

It was suspected that Mr. Herridge may have come to Edmonton to confer with Premier Aberhart and other Social Crediters. He was accompanied on his western trip by Charles A. Bowman, an ardent disciple of Major C. H. Douglas and of Social Credit. Mr. Bowman's position as editor-in-chief of the Ottawa citizen, one of the Southern chain of newspapers which includes the Edmonton Journal and the Calgary Herald, evidently embraces Social Crediters sometimes, because the fact that a Social Credit newspaper is a member of the Southern chain makes a joke of the Social Crediters' claim that the Alberta newspapers are "controlled by the financial interests" and "tentacles of the octopus."

Among the hints of an approaching election, some observers say, are the fact that Liberals are very busy now choosing candidates for the next federal election, and the report that men are being selected for the enumeration of voters which must precede that election.

There are other equally strong indications, however, that there will be no national election before October of next year. None is required by law until early in 1941.

If Mr. Herridge did have a conference with Mr. Aberhart, it was kept secret officially. But Aberhart did meet him briefly, at least, and did spend a long time with Mr. Bowman. So did L. D. Byrne, Social Credit "expert" sent here by Major Douglas.

The national political picture is of interest in Alberta provincial politics now, particularly, since Social Credit politicians are wondering what can be done in the federal field in order to increase their prestige in the provincial field. Results of their efforts in British Columbia, Saskatchewan and Manitoba in the past two years have discouraged them greatly. They sought to take some credit for Social Credit in the New Zealand election last week when the Savage government was returned, but the fact that Social Credit was repudiated officially by that government long before the election ruins the Alberta claim.

The treasury branches, also called "credit houses," seem to be continuing operation in the seven points where they have been established. They have met no opposition whatever, except the almost complete indifference of the people. Chartered banks have been giving the treasury branches every co-operation possible, honoring their "cheques" when presented by clients in good repute and providing cash in exchange for them. Such co-operation is reported to have

been a sore blow to the plans which the government and the Social Credit board were reputed to have drawn up for propaganda against the banks on the basis of expected opposition.

The indifference with which the people are treating the "credit houses" was shown in Edmonton last week. The Chamber of Commerce and the Retail Merchants' Association arranged a big dinner meeting to discuss and explain the scheme. G. L. MacLachlan, M.L.A., and Floyd Baker, M.L.A., as chairman and secretary of the Social Credit Board, were invited to address the meeting. Three hundred merchants were invited, but only twenty of them accepted, so the meeting had to be cancelled.

Liberals are claiming a certain victory in the Athabasca provincial election, set for Nov. 7. They have done little campaigning there yet, but the Social Credit forces have been busy in the interests of C. H. Tade, who won the seat in 1935, resigning in favor of Hon. C. C. Ross, and became the president of the Alberta Social Credit League. Mr. Tade was chosen as candidate by the "selections committee," which Aberhart attended, although he had been far from getting the most votes in the nominating convention. Liberals were delighted when the Social Credit strategists chose him.

Mrs. Edith Gostick, M.L.A. for Calgary, was among the first Social Crediters to enter the campaign. She told her audience that newspapers were told in advance by Hon. J. C. Bowen, lieutenant-governor, that he was going to reserve assent on these bills last October. The truth was that newspapermen in the press gallery of the house did not know what was going on until the information leaked out of the Social Credit emergency caucus, which was called when the legislature was adjourned suddenly that afternoon.

PAPER DISCUSSES ACCIDENT- PREVENTION IN MINES

Helpful suggestions to mine operators in the establishment of an accident-prevention organization are contained in a paper by W. E. Montgomery, safety engineer, Quebec Asbestos Producers' Association, appearing in the October issue of the Bulletin, Canadian Institute of Mining and Metallurgy. The paper was awarded first accident-prevention prize (1937-1938) donated by Mine Safety Appliances Co., Pittsburgh.

Accident-prevention work in years gone by, the author notes, has been carried on by many mine managers as a philanthropic movement, but in recent years they have come to realize that safety is good business, and pays tangible dividends.

The foreman is described as 'the most essential cog in the entire accident-prevention organization,' as specific safety education is in his hands, and it is his attitude toward it that will determine the degree to which his men observe safety regulations. Accident-prevention work is primarily education and requires constant effort. It will not continue on its own momentum as it operates in a direct ratio of the effort expended. Intensive safety programmes have produced remarkable results, but never has the excellent record achieved continued after the "drive" was over.

Keeping of adequate records and statistics is most essential in intelligent accident-prevention work, and it is important that all records be kept on a common basis, for it is only then that a true picture will be obtained. Statistical information is necessary to determine the accident-causing conditions and places. In any accident-prevention campaign, the companies concerned should take the initiative, as by doing so they will gain the confidence of the men, and also show the sincerity of those in charge.

McPherson: "Lass, I could sit here and look at you forever."

Jean: "That's what I'm beginning to think." —The Gateway.

Coleman business people as a whole have decided to accept goods coming in by no other means than the C. P. R. freight or express. Some of the Blairmortes have also fallen in line. It is really time such action was taken, and it should be a 100-per-cent action by the people of the whole Crow's Nest Pass, practically every one of whom are dependent upon our coal mines for their very existence, and the C.P.R. represent the largest consumer of coal.

The United States proposes to build nine super battleships, to cost around \$70,000,000 each.

We remember the time when it took two sheep to clothe a woman. Now a single silkworm can do it.

Butchers in small villages round about are wondering just how much the government is ahead by sending collectors around to check up on every horn that may be involved in the sale of a cow by a farmer to a butcher. These collectors travel in handsome government cars, and all they will pick up at small butcher shops would not pay the cost of travelling to the village. Yet the butchers have to dock each farmer who sells them a horned cow. So the farmer who himself needs the money is just contributing to the upkeep of another government man. It's a great way of providing more government jobs—robbing the farmer of a dollar, if the cow he happens to sell to the local butcher has a horn on it.—High River Times.

HARD TIMES

Hard times is a relative term, but one which is used invariably when folk complain about taxes and when editors warn that the people can hardly stand the burden of governmental costs. In this connection it is of interest to note that a recent publication of the Dominion bureau of statistics shows that the tidy sum of \$109,209,342.00 was spent in the liquor stores of Canada in the year 1937. The value of gross sales by the liquor control boards and commissions in eight provinces, in 1937, was as follows:

Nova Scotia	\$ 4,648,423
New Brunswick	3,535,446
Quebec	14,093,171
Ontario	54,015,199
Manitoba	5,191,993
Saskatchewan	6,718,218
Alberta	7,660,709
British Columbia	12,746,783
Total	\$109,209,342

In the same year, there were sold in Canada 5,855,985,000 cigarettes and 123,956,872 cigars. Figuring the retail price of cigarettes at one-cent each, we paid out more than fifty-eight million dollars for "fags" in that year. During the same period \$21,000,000 was wagered at Canadian horse races.

Naturally, it should be remembered, that many thousands of Canadians make their livelihood through the production, merchandising and management of these things, and the federal and provincial governments pick off substantial tax revenues. The point is, however, that the spending of nearly \$100,000,000 in a single year on these three luxury items testifies that the purchasing power of the people of Canada is not quite so close to the vanishing point as is suggested at times. (A more recent report shows that in the year ended March 31, 1938, our consumption of cigarettes reached the impressive total of 6.8 millions.)

COWLEY HAPPENINGS

The second of a series of card parties being sponsored by the ladies of St. Joseph's Catholic church, was held in the Masonic hall on Wednesday night, when eight tables of progressive whist were at play. Prizes were won by Mrs. Lou Lehmire, ladies' first; Mrs. George Porter, second; Dick Alexander, gent's first, and Rev. Father Sullivan, second. Father Sullivan was master of ceremonies.

Miss Ruth Mitchell is attending Garbutt Business College in Lethbridge for the current term.

J. Lote, M. A. Percevalet and F. Wells have returned from a trip of a few weeks to Vancouver and other western points by motor.

A modern girl puts court plaster over her appendectomy scar before joining a nudist colony.

BELLEVUE HAPPENINGS

H. Meade was a week-end visitor to Calgary, where Mrs. Meade is a patient in the Holy Cross hospital. Charles Ray, G. Knowles and Harry Ward were Saturday and Sunday visitors to Lethbridge.

James Watson, of Michel, spent the week end visiting at the home of Mr. and Mrs. D. Morris.

Mr. and Mrs. George Barnett were week-end visitors with Mr. and Mrs. Barnett, senior, at Michel.

The home of Mrs. George Coupland was the scene of much merriment on Wednesday evening last, when about twenty friends gathered at a miscellaneous shower in honor of Miss Freda Wolstenholme, bride-elect of November. The first part of the evening was spent at whist. Following the serving of a dainty luncheon, the guest of honor was presented with many beautiful and useful gifts, for which she very ably thanked her assembled friends.

Mrs. George Chiarovano returned Saturday night from a three months' visit to Italy.

Mr. and Mrs. L. Gibson, of Calgary, are visiting at the home of Mr. and Mrs. I. Hayson.

Mr. and Mrs. J. L. Cousens and R. T. Johnson were Sunday visitors to Fernie.

The sixteenth anniversary of Bellevue United church was celebrated on Sunday and Monday. On Sunday morning at 11, the Rev. E. B. Arrol, B.A., of Blairmore, conducted the service, with the junior choir in attendance and rendering special music. The evening service was conducted by Rev. C. Burkholder, head of the young people's work of the United Church of Canada, of Toronto. Mr. Burkholder delivered a very helpful and inspiring discourse. Special music was provided by Mr. George Burles, of Blairmore, and the senior choir. Both services were largely attended. The celebration was further marked by the annual anniversary supper, served from 5 to 7 p.m. on Monday in the Oddfellows' hall under the able supervision of Mrs. S. T. Humble, assisted by members of the church board and the congregation. The supper, which was a huge success, brought the anniversary programme to a fitting close.

HILLCREST HAPPENINGS

The Hillcrest United church ladies aid held a very successful supper in the K. P. hall on Thursday evening last.

W. Williams was slightly injured while working in the local mine on Monday.

Mrs. J. Mansell, accompanied by Mr. and Mrs. L. Sheratt returned last week end from England, where they have been visiting for the summer months.

Miss C. Cassagrande is substitute teacher in the local school.

JUST GUESS ON THIS ONE

It hardly comes within the realm of criticism to state that the people in Alberta are a trifle bewildered over the new credit house plan. Just how that 3% bonus on Alberta-made goods can be paid, even in credits, month after month, without in some way creating a drain upon the public treasury is surely a mystery to us.

Visitors at the Press Convention from points where credit houses had been opened up told the convention that the set-up carried with it the usual A-bert-Hitter coercion clause: "You sign up or else!"

It is again putting Mackenzie King on the spot. No doubt many of the functions of the credit houses are purely banking in nature. Will the chartered banks stand idly by and pay \$100,000.00 into the Alberta treasury to see an untaxable organization take away their profitable sources of revenue? You guess on this one!—Clareholm Local Press.

New Zealand has voted for the continuance of the open bar system. The vote resulted: for continuance of the present system 501,420, for prohibition 244,189, for state control 94,205.

At a meeting of delegates held in Lundbreck on Sunday last, Kenneth McDowell, of Beaver Mines, was elected by acclamation as trustee for sub-division No. 3 of Pincher Creek School Division 29, which comprises Lee, Confields, Lundbreck, Gladstone Valley, Passburg, Burnias, Beaver Mines and Firzgo schools. He was also elected delegate to the division meeting.

The ash is said to be the thirstiest of all European trees. Well grown specimens will draw 55 quarts of water from the ground on a hot day.

During the anniversary services at Pincher Creek United church on Sunday last, George Kerr, of Blairmore, rendered several viola selections. Rev. J. N. Wilkinson, of Gleichen, former pastor of the church, was the guest preacher. On Monday night the annual supper and concert were held. Taking part in the concert program were the following artists from The Pass: Mrs. R. Upton, Bellevue; Freda Antrobun Coleman; George Kerr, George Burles and Frank Hasek, Blairmore and Frank.

Herman Hersh, who mysteriously disappeared from Coleman and The Pass the early part of last week, was apprehended at Moosomin, Saskatchewan, after he had disposed of his stolen car, the property of VanDuzee, of Coleman. Mr. VanDuzee, accompanied by a member of the local detachment of the R. C. M. Police, left for Saskatchewan on Sunday and returned to Blairmore Tuesday night, the former bringing his car back, the latter in custody of the prisoner, who will face charges in local police court.

Let Quaker **WIN A PRIZE!**
cut your baking **\$5000 in prizes**
time in half! **every week!**

Delight your family with the tastiest, most delicious bread and rolls you've ever made! Make up your mind today to join the thousands of happy housewives who have changed to the new Quaker Method of Easy Bread Baking with Quaker Flour. In just half the time, with one quarter the work, you can make better, lighter, easier bread and rolls, and do away with costly baking failures. Be sure to use Quaker Flour—the superior, all-purpose flour that's sold only with a money-back guarantee of complete satisfaction.

*If only you didn't have to worry about the quality of the flour you use, you could win \$5000 in prizes every week!

\$5.00 a week will be awarded for the best 10 entries describing in 25 words or less, "Why I like Quaker Flour and the Quaker Method of Easy Bread Baking." You can win!

Quaker Flour **FREE!** Always the Same for Bread, Cakes and Pastry. A helpful copy of this valuable booklet, "The Quaker Method of Easy Bread Baking," is yours for the asking.

WORLD HAPPENINGS
BRIEFLY TOLD

The Smithsonian Institution announced the discovery of a new species of starfish which will measure the heat of a star billions of miles away.

More than half of the 4,000 United States volunteers who took up arms in the Spanish civil war apparently have been lost in action.

Red Cross officials estimated they would require \$50,000 for the work of rehabilitating families who lost their homes in forest fires in the Fort Frances, Ont., area.

The New Zealand government is sending to England 30 airmen for training, to return as pilots in the 30 Victoria aircraft recently purchased in England.

Members of the British Legion, ready to sail for Czechoslovakia to police the proposed plebiscites in mixed population areas, were advised their services would not be required.

A meteor, throwing off a stream of sparks and followed by a trail of flame, is reported to have fallen southwest of Ottawa. Efforts to locate it were unsuccessful.

An extensive campaign against return of any part of Windhoek to Germany is planned by a "Southwest African League" now being formed there.

Lord Stanley, dominions secretary and heir to the Earl of Derby, who died recently at a London clinic, visited Canada and opened the Canadian National Exhibition at Toronto this year.

Recruits continue to enlist in the regular army in increased numbers despite the peaceful solution of the European crisis, the War Office announced. In a recent week 949 were enrolled, 523 more than in the corresponding week of 1937.

To Meet Emergencies

Proposal For British Test Mobilization To Be Held Annually

A plan for an annual test of mobilization of British civilian population to meet any emergency of the future has been placed before the committee of imperial defence by Calgary-born Brig.-Gen. A. C. Critchley.

The scheme is based on precautionary measures covered by the special promoter 13 months ago and applied to his vast enterprises during the recent crisis.

At that time a large number of his employees were promptly released for duties with the Territorials, the balloon barrage, and the air raid precautions organization, but pre-arranged programs were carried out without a hitch by the immediate introduction of a shadow plan.

General Critchley now proposed that the civilian population should similarly be organized and called up for a test drill next summer. He suggests a trial evacuation of congested areas, the manning of all branches of the defence service, and mobilization on the basis of a national register with a minimum of disturbance in industry.

Poultry For British Guiana

B.C. Poultry Breeders Supply Foundation Stock At Good Prices

So satisfactory has a shipment of record-of-performance poultry from Canada to British Guiana made last year proven to be that the Department of Agriculture for that country recently placed under another order through the Dominion Department of Agriculture. This recent order is for eight white leghorn pullets and two males and eight Rhode Island Red pullets and two males, all of record-of-performance breeding stock. The birds are now en route to British Guiana. The shipment was purchased from two British Columbia poultry breeders. The satisfactory price of \$15 each was paid for the pullets and \$25 each for the males, f.o.b. breeders' farms. These birds, like last year's shipment of Barred Plymouth Rocks, are to be used for foundation breeding stock in British Guiana, where poultry raising is becoming an increasingly important industry.

Near The Polar Sea

In the frozen areas of Grant Land, facing the Polar sea, scientists have discovered 76 kinds of plants, five species of butterflies, and two species of bumblebees. Grant Land has an average summer temperature of 34 degrees above zero and an average winter temperature of 36 degrees below.

A tooth is the only part of the body that cannot repair itself.

Some minds are so open that current events blow right through them.

Mercury must be present in an alloy before it can be called an amalgam.

For Healing Wounds

New Oxygen Treatment Is Shown American College Of Surgeons

Oxygen loosely locked up in grains of white powder was reported as a new treatment for healing wounds rapidly.

The process was shown to the American College of Surgeons at a clinic at Presbyterian Hospital by Dr. Frank L. Maloney.

Oxygen, it was explained, is supposed to owe its healing power in wounds to its ability to drive out the kind of bacteria which live without oxygen. They are known as "anaerobes" and include some of the serious sources of infections.

The obstacle to using oxygen has been its quick evaporation from the wound. The powder is a new product of chemistry, zinc peroxide.

It is dissolved in liquid and flushed through a wound. The heavy zinc particles spread through the injured tissues and lodge there. Each grain of the zinc treatment becomes a local fountain of oxygen. It keeps on giving off oxygen for several hours.

Books as part of the cure after an operation were urged by Gordon R. Kamman, M.D., of the University of Minnesota.

The right books, he said, will help in recovery, and the wrong ones will make the patient worse.

"Too few people," he said, "are aware of the possibilities of reading in the treatment of medical, surgical and psychoneurotic patients. The individual must be regarded as a whole and we no longer cling to the dualistic concept of men in which the mind is considered separately from the body."

"To allow outsiders to supply patients with reading material unsupervised is as bad as allowing them to bring the patient his diet or medicine."

The right books, Dr. Kamman described as those which take the patient's mind off himself. The "so-called tired business man," he said, is a tough subject for books because as a rule this man has been so busy making money he never has had time for reading and is not interested.

A Suggestion Made

A Little Discussion Over The Regal Visit To Toronto

Neither Toronto nor any other city is entitled to claim a prominent place in a three-week visit of the King and Queen to Canada. It goes without saying that Toronto people will be proud and delighted to have the royal visitors as guests for as long as it is convenient for them to stay, but when a communication to that effect has been forwarded to those in charge of the Canadian visit, that is as far as Toronto's importunities should go.

The suggestion which has emanated from the Board of Control that Mayor Day should write to Lord Tweedsmuir stressing Toronto's claim to a prominent place in the royal plans is the type of thing which has caused for this city the opprobrious sobriquet of Hogtown. Without any thought as to the national character of the visit, it is proposed that a letter in this sense should be forwarded to Ottawa "so that a lengthy visit to this city would definitely form part of 'Their Majesties' Canadian itinerary.'"—Toronto Telegram.

Have Become Important

Skies Of Asia And Mice Are Of Value To Japan

Rats and mice are ordinarily thought of in Japan, as elsewhere, as unmitigated pests.

But in the present period, when substitute materials are being sought on every side, they have been included in the general scheme of "commodity mobilization."

Their skins, it is asserted, can be tanned and used as material for knapsacks, brief cases, vests, lining of coats and other articles which are usually made out of more valuable materials.

The market for dead cats and dogs is rising for the same reason, the value of their skins.

The prices of the various animals are, reported as follows: Five to seven yen (six to eight shillings) for a dog, one yen for a cat, ten sen for a rat, and five sen for a mouse.—London Observer.

Very Friendly

The British battle cruiser Hood and the German pocket battleship Deutschland exchanged friendly greetings recently as they left the harbor at Gibraltar. The Hood band played "Deutschland, Uber Alles" when leaving for Marseille. The Deutschland, bound for Cadix, responded with "God Save the King."

Australia's first factory for making Annistone carpets is being built.

The Olympic Games were revived in Athens in 1906.

Modern Travel Speedy

In Three Hours, Our Accomplishes 18-Day Cruise Trip

Difference between modern travel and traffic a century ago was driven home to three boatmen at Winnipeg recently.

Harry Bushel, his 14-year-old son, Andy, and Murray Feden started out by canoe, on the Assiniboine river from Brandon to paddle to Winnipeg. The 150-mile trip ordinarily is made in about three hours by automobile but it took the paddlers 18 days to complete the voyage.

They estimated the winding river route is 600 miles in length and their one desire near the journey's end was to reach the canoe, climb into civilized clothing and head for the nearest movie.

The trip was made in a 16-foot canoe and they carried 600 pounds of equipment. Actual time on the water was about seven hours a day for 13 days. The rest of the time was spent on stop-overs.

There were many rocks and rapids along the way, Bushel said, and the going was "tough" during the first four days. Nights were spent along the river bank in a cove. They started out about six o'clock each morning.

There were no rapids, Bushel said, although once the rapids swirled the boats around and they shot down the river backwards.

GOOD NEWS FOR LARGER WOMEN
By Anne Adams

4920

Turn your eyes towards winter and you'll discover many a need for this flattering frock—especially designed for the larger figure up to size 50. Don't you like the scalloped neckline? It lends such dainty distinction to an otherwise simple silhouette! The pockets and the ruffle edging are other chic details. As for the panels at front and back, they slenderize to an almost magical extent—because they flow the full length of the dress. Indeed, you can't find more becoming lines of greater comfort in any style! When you consider the making, remember that there's a Sewing Instructor to help you! Choose chambray, percales and tulle. Send for this pattern today. Pattern 4920 is available in women's sizes 36 to 50. Size 36 takes 4½ yards 36-inch fabric and 1½ yards ruffling.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

AUSTRALIAN HUMOR

2278

"Now isn't that amazing? My horoscope said I'd meet a tall, dark man in strange circumstances."

—From The Sydney Bulletin.

New Surgical Tools

Advances In Electricity Are A Great Aid To Surgery

New surgical tools which give their own light like fireflies or glow worms were exhibited to the American College of Surgeons.

One, called a depressor, could be substituted for the spoon, which grandfathered used to hold down a child's tongue while looking for a sore throat.

Of clear, glassy material, solid and a quarter of an inch thick, this new tool would glow all over with a green-yellow light. But its lower tip, down in the throat, would shine with a brilliant light to illuminate the entire throat.

These tools are made of a new synthetic material which is as clear as glass. But it has the peculiar property that light will follow its interior around a curve.

Great advances in electricity as an aid to surgery were exhibited. One is the radio knife, an instrument which will make an incision half an inch deep merely by resting the edge of the knife on the skin. Radio waves, about 100 metres long, produce this cut by vaporizing the water in the tissue cells until they explode. Yet the resulting cut is as thin as a razor blade, with just enough heating along its edge to prevent more than slight bleeding.

The surgeons were shown that this radio incision can be used to advance in many special operations, in the brain, chest, eyes and glands. It was declared to be an easier method of sterilizing wounds.

U.S. Defences

Mass Production Of War Equipment Is Indicated

President Roosevelt said he was making an entirely new study of the United States' national defence needs and that until it was completed he could not estimate next year's budget.

The president told a press conference new technical developments in national defence measures required a complete study of defensive requirements.

He said the reason for the re-assessment of these needs began to take shape about a year ago because of information coming in connection with world events. He said the question was forced to a head in the past month. In response to a question he said the new information was of a technical rather than a political nature.

One of the things being studied, he said, was the mass production of war equipment, including airplanes, power and other items. He said the production question was something new and intimated one phase to be studied was standardization of plans production, which some countries already have adopted.

Trains And Planes

For 'Many People Locomotive Will Never Lose Its Glamor

The other day, says R. H. in the Victoria Times, I kept abreast of a heavy train train down the Fraser Canyon for miles and miles, so close that I could see the tobacco glow in the bowl of the engineer's pipe, and I found that I wished then, as intensely as when I was seven years old, that I was a locomotive engineer, with a plant of steam under me. In time, I dare say, the airplane may acquire a glamor like that, but not for many years. We may use it but shall never love it as we love a train. An airplane is a new thing, an upstart. A train was our friend in boyhood, and the sound of its whistle will always remain in our hearts.

It is said that one of the reasons given by Louis XIV. for the building of the great palace at Versailles was that it would provide employment for 30,000 workmen over many years.

SUNDAY SCHOOL LESSON

OCTOBER 30

PERSONAL RIGHTS AND WHERE THEY END

Golden text: What then? shall we sin because we are not under law, but under grace? God forbid. Romans 6:15.

Lesson: Ecclesiastes 2:1-3, 10, 11; Romans 6:2-8; 14:21.

Devotional reading: 1 Corinthians 6:9-11.

Explanations And Comments

The Quest of the Chief Good through Enjoyment, Ecclesiastes 2:1-3. In the first chapter the writer has been discussing his quest for the highest good in the shape of wisdom. That quest proved unsatisfying, and he now turns to enjoyment as the source of the highest good.

The Vain Quest through Possessions, Ecclesiastes 2:7-11. The writer indulged in every desire of his heart, acquired slaves, herds and flocks, precious metals, musicians and inmates of the harem, but, as before, all was vanity, a striving after wind, and there was no profit under the sun, none of the things could satisfy him.

I withheld not my heart from any thing, says the writer in the Dictionary of Texts, "these remarks of Paine on Alfred de Musset: 'He desired too much, he wished too strongly and greedily to taste life in one draught, thoroughly; he did not glean or taste it, he tore it off like a bunch of grapes, crushing it, crushing it, twisting it, and he remained with stained hands, just as thirsty as before. Then broke forth sobe which found an echo in all hearts.'"

The Highest Good, Romans 6:15-23. The "One-Volume Commentary" paraphrases this section as follows: "Some assert that if they are no longer under law they may indulge in sin. Impossible! You belong either to sin or to God; you cannot belong to both. Each advances the servant of sin once, you have now taken to Christian teaching as your rule of life. Thus exclusive the service of sin for the service of Righteousness. The illustration is inadequate, for you are better than slaves, you are God's children. But I want you to see that you must now devote your bodies to righteousness and sanctification as unreservedly as once you devoted them to impurity and license. Formerly, you were under sin only, and the only reward you had to look for was eternal death. Now you serve only a service leading to sanctification, with everlasting life in prospect. Make no mistake. Those who are under the death they have deserved. But God gives to his servants what they could never earn. Everlasting life in union with Christ."

Abstinence for the Sake of Others, Romans 14:21. If anything that you do would cause a brother's fall, avoid it for his sake.

Heavy Investments

Large Sum Of United States Money Invested In Canada

United States investments in Canada amount to \$3,639,000,000—more than one-third of the total United States investments abroad and by far the largest block of the total, according to a survey by the United States Chamber of Commerce.

The complete statistics for 1937 show that in addition to the Canadian investment, United States investors had placed \$2,562,000,000 in South America, \$2,372,000,000 in Europe and more than \$800,000,000 in the West Indies.

The survey also disclosed that expenditures of Canadian travellers in the United States account for two-thirds of the total travel outlays by foreigners in the United States, while United States travellers in Canada spend here half of the total travel outlay of the United States.

They believed that their discovery might open the way for a new study of the dietary diseases, such as peptic ulcers, rheumatism, arthritis, appendicitis, pernicious anaemia and leukaemia.

One way of destroying the germ, they said, was by fermentation or alkalization of the cereal before consumption.

Tooth Decay

Physicians Claim To Have Isolated Germ That Causes Trouble

Isolation of the germ that causes tooth decay was reported by Dr. H. Belding, dentist, and his brother, Lieut. L. J. Belding, physician attached to the naval academy at Annapolis, Md.

The germ is nurtured, they said, in food made from cereals, mostly wheat, corn and oats. The fermentation of these foods causes acid in the saliva which attacks the tooth enamel. The germ can be eliminated by processing the cereal, they said.

Their findings report to the First District Dental Society of the State of New York.

They believed that their discovery might open the way for a new study of the dietary diseases, such as peptic ulcers, rheumatism, arthritis, appendicitis, pernicious anaemia and leukaemia.

One way of destroying the germ, they said, was by fermentation or alkalization of the cereal before consumption.

Highway Program

Ontario To Spend Ten Million Dollars On Roads In Next Five Years

R. M. Smith, Ontario Deputy Minister of Highways, announces that during the next five years 283 miles of road from Sudbury to Sault Ste. Marie would be paved at a cost of \$10,000,000.

Mr. Smith was reviewing road construction projects between North Bay and Sault Ste. Marie with Hon. T. B. McQuesten, Ontario Minister of Highways, and A. A. Smith, chief engineer of the Highways Department.

"With the exception of three miles between the Veuve river and Hagar, grading has been completed between North Bay and Sudbury," James Cooper, M.L.A., Sudbury, who accompanied the party, said.

One roadwork contract was awarded for \$250,000 this year. Cooper added. Another was for \$160,000 and there were various smaller contracts throughout the district.

Industrial arbitration first was employed in the settlement of labor disputes before the French Revolution at Lyons, when controversies arose in the silk industry of France.

Beef and cabbage cooked together comprise the English dish of "bubble and squeak."

According to one London magistrate, "Boxing the ears is the most dangerous way of hitting anyone."

An excellent lubricant for squeaking doors and other parts of a car is a common wax crayon.

Engines Of War

Best Way To Combat Air Raids Is To Meet Invaders In The Air

A Great War veteran who has scrutinized the "terrible engines of war" finds them neither as fearsome nor as awe-inspiring as one might expect.

Col. E. J. C. Schmidlin, director of engineering services, department of national defence, told members of the Engineering Institute of Canada at Toronto that in spite of advances in design and fire-power of modern military weapons, conditions in any future war would be no worse than those of 1914-18.

Each advance in weapons of offense, he said, has been offset by corresponding improvements in defensive armament.

Best defence against air raids, he declared, was to meet the invaders in the air before they reached their objective. A fleet of fast pursuit ships could cope successfully with the attacking ships, he asserted.

If this method had been followed in the Spanish war he doubted if the insurgent airmen would have caused the damage they did.

Tooth Decay

Physicians Claim To Have Isolated Germ That Causes Trouble

Isolation of the germ that causes tooth decay was reported by Dr. H. Belding, dentist, and his brother, Lieut. L. J. Belding, physician attached to the naval academy at Annapolis, Md.

The germ is nurtured, they said, in food made from cereals, mostly wheat, corn and oats. The fermentation of these foods causes acid in the saliva which attacks the tooth enamel. The germ can be eliminated by processing the cereal, they said.

Their findings report to the First District Dental Society of the State of New York.

They believed that their discovery might open the way for a new study of the dietary diseases, such as peptic ulcers, rheumatism, arthritis, appendicitis, pernicious anaemia and leukaemia.

One way of destroying the germ, they said, was by fermentation or alkalization of the cereal before consumption.

Highway Program

Ontario To Spend Ten Million Dollars On Roads In Next Five Years

R. M. Smith, Ontario Deputy Minister of Highways, announces that during the next five years 283 miles of road from Sudbury to Sault Ste. Marie would be paved at a cost of \$10,000,000.

Mr. Smith was reviewing road construction projects between North Bay and Sault Ste. Marie with Hon. T. B. McQuesten, Ontario Minister of Highways, and A. A. Smith, chief engineer of the Highways Department.

"With the exception of three miles between the Veuve river and Hagar, grading has been completed between North Bay and Sudbury," James Cooper, M.L.A., Sudbury, who accompanied the party, said.

One roadwork contract was awarded for \$250,000 this year. Cooper added. Another was for \$160,000 and there were various smaller contracts throughout the district.

Industrial arbitration first was employed in the settlement of labor disputes before the French Revolution at Lyons, when controversies arose in the silk industry of France.

Beef and cabbage cooked together comprise the English dish of "bubble and squeak."

According to one London magistrate, "Boxing the ears is the most dangerous way of hitting anyone."

An excellent lubricant for squeaking doors and other parts of a car is a common wax crayon.

NIGHT COUGHING CAN OFTEN BE PREVENTED

If your child often coughs at night because of even a slight cold—do this at bedtime: Thoroughly massage Vicks VapoRub on throat, chest, and back. VapoRub's potent vapor action tends to keep the air-passages clear, helping to maintain normal breathing through the nose, and so reducing night-coughing. Try it tonight—learn for yourself another reason why VapoRub is a family standby in more homes than all other medications of its kind put together.

POOR MAN'S GOLD

Courtney Ryley Cooper

© Courtney Ryley Cooper, WNU Service

CHAPTER VI.—Continued

Hammond bent to file the ragged edge of a long-handled shovel. Don't you think it's up to us to get as much gold out of that creek placer as we can? We'll have to be hating men soon."

The older man shot him a quick glance.

"That's the fourth or fifth time you've brought that up," he said.

"Well," asked Hammond, "didn't we talk it over the other night?"

"We didn't come to any decision," "I did."

"That doesn't make two of us."

A certain asperity had grown up between the two; looking back, Hammond felt that McKenzie Joe's nature had become steadily sourer ever since the first arrival of Timmy Moon's airplane and its passengers. Jack had resented that, as though it were an implied insult to the girl he loved.

"We Didn't Come to Any Decision."

"Look here, Joe. We've got to get our money out of this discovery. We can't stay here forever."

"Seems to me," McKenzie Joe said, as he looked out over the valley, "when we found this place, we both

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pay that Seeks You. Read the story of the man who has been completely out of from them. Just as surely you are slowly suffocating if your blood lacks red particles. They carry the oxygen from the lungs to every part of your system. Without enough oxygen, your muscles grow weak, your stomach and bowels slow down, your skin may become itchy—you live quickly—

What you need is Dr. Williams' Pink Pills. They build the red corpuscles and thus increase the carrying capacity of your blood. Get Dr. Williams' Pink Pills today at your drugstore. In fact, for the cure of all blood ailments, this proven blood-builder will help give you back your pep. Gen. 1908, U. S. Patent Office, Ala.

agreed it was where we were going to settle down—that we had a life job."

"We're not going to have a year's job. If we don't find that older bedrock. That Leon creek placer won't be enough for us."

"It's enough for me right now," the older man said. "I ain't ever seen that much money before."

Hammond bent over the shovel blade.

"Our ideas are different there," "You mean, you've let somebody change 'em for you?"

Hammond threw down the shovel; it clattered on the wooden floor.

"I'm getting tired of that. If you've got anything to say about Kay Joyce, come out and say it."

The other man glanced at him over his shoulder.

"Did I mention any names?" he asked quietly and moved away toward the upper diggings, a new test shaft, somewhat distant from camp and rather deep in the forest, by which they sought the bedrock.

Hammond did not follow.

Instead, with the shovel over his shoulder, he headed for the placer workings along the creek. It was a rejuvenated camp through which he moved. A rattle sounded from the lake and Timmy Moon's airplane took off for Wrangell. From far away came the sound of hammers over at Around the World Annie's, on the Alaskan side; a tiny town had begun there; she called it Whoopees.

As Hammond walked on, he passed a squat Swahili squaw, gleaming in a new shawl of widely checkered design, an importation by air.

Then he became aware that someone was calling him. It was Jeanne Towers, waving excitedly from the doorway of her cabin store.

"I've almost sold out!" she exclaimed, as he approached. "I'm going to send in another order tomorrow."

Jerry Baine, she's the one with the all-metal junkies, is going to bring me back a whole lot of stuff from Fourcours."

"That's the way a business grows," Hammond bantered. "Two hundred dollars for claim, doubled all in a couple of weeks."

Jeanne laughed, tipping her homemade gold scales with a toying finger.

"Well, nearly doubled. I hope I do it again."

"You do a dozen times after that. Then I'll know where to borrow if the gold-mining business plays out!"

He went on then, at last to reach Leon creek. Kay was not yet there; it was still breakfast time in most of the camp. But Bruce Kenning was moving along the stream, toward one of his claims a quarter mile beyond. A few hundred yards up the stream, where the raw-boned Olson scooped the earth by great shovelfuls into his sluice, was Mrs. Joyce. Hammond saw her there often; now and then he had found Olson sitting on the veranda of the Joyce cottage, talking of wanderings in many lands in his search for gold, while Mrs. Joyce gave far more than her usual monosyllabic rejoinders. There was something about the man which seemed to fascinate her. Suddenly he ceased his musings. Bruce Kenning had come beside him.

"How's the work going with McKenzie Joe?" he asked quietly.

Hammond shrugged his shoulders. "I haven't been able to get anywhere. He still wants to put down one thing at a time and give the rest of his life to it."

Kenning frowned.

"You can't have that. I'm convinced that the old river bed lies over toward the British Columbia hills," he chuckled. "I wish it were the other way around—all my claims are in the other direction."

Hammond grinned. "Well, you can't say I didn't tell you."

"Oh, you're talking about the stuff I bought from Jeanne Towers. I've added to that a great deal on the chance that somebody around here would want it. But everybody's looking the other way. Just as well, I'm obligated to turn over some worthless claims to an English syndicate."

"That's beyond me."

"Something I took over out of what was left when Joyce died. I guess the house is crooked. They say frankly they probably won't develop the property. They just want something cheap in a live mining camp."

"A stock-selling scheme, probably."

"Haven't much doubt about it. Be glad to have the thing over."

"So would I," Hammond felt he could share Kenning's repugnance. He was first these days with the thought of new gold, clean money. The eagerness had been mounting ever since that night when Kay had told him her decision. To get gold for Kay—his little niece—his mind was centered upon little else.

"How deep do you think we'll have to go to reach that old bedrock?"

"A lot deeper than you'd imagine—ninetly to a hundred and twenty feet. From my study of the strata, I can't see any other answer."

ONLY THE BEST

IS GOOD ENOUGH

This outstanding triumph is proof of quality. Twelve first prizes in twelve classes, in this year's Baby Show at the Toronto and Ottawa Exhibitions, were won by babies fed on "Crown Brand" Corn Syrup.

What better evidence can there be of the confidence which Canadian mothers and their physicians have in the purity and quality of "Crown Brand."

A delicious table syrup, "Crown Brand" is a treat for the whole family.

Tell the boys that glasses of famous hockey size can still be obtained in "Crown Brand" Corn Syrup tins.

CROWN BRAND CORN SYRUP

THE FAMOUS "FOOD" THE CANADA STARCH CO. Limited

Hammond whistled.

"That means a lot of work."

"You bet it means work and men. As a concentrated campaign. Any other method will keep you here for the next fifty years. You've got to spend money to make money in mining."

"That's what I've been trying to tell McKenzie Joe. But he—"

There he halted. Kay was coming down the trail. Bruce Kenning called good morning and went up the stream. Hours later, with Kay and Hammond watching intently, the workmen began a clean-up of the sluice box on the Joyce claim. It only revealed the usual four gold, indications of something more to come, but as yet, nothing worth saving.

"Whether this flume nor the sluice is long enough," one of the workers complained. "Me 'n' Jim waste an awful lot of time just standin' around, fer fear of shovin' in too much gravel."

"Then, build 'em up now, while you're dried out for the clean-up," Hammond said. "I'm going past the sawmill. I'll tell 'em to send some lumber."

"And nails," called Kay. "I'll get them."

Hammond left the stream, with its lines of eager workers. At the sawmill he gave the lumber order, then he went to the gravel counter. She met him, some fifty yards away, returning from the delivery of a batch of darning.

"Haven't sold all those nails?" he asked.

"I think there are some left. There's been a run on them this morning. Everybody in camp wants nails—or glass."

They reached the store and she asked the peg from the bag—four persons in Sapphire Lake even bothered to close their doors. Then, pushing the door open, she walked within, the store, suddenly to gasp and to hurry around the end of the rough counter.

The crudely built money drawer stood open. The girl wavered, staring at it; her hands half-raised, her jaw sagging. Then she said, in a quivering, dazed voice:

"Somebody's been in the store!"

"Had you left your money here?" Hammond asked sharply.

"Yes—all of it. I—I thought—nobody ever bothers to look up—"

Hammond stared about him. It seemed incredible that crime should have entered this far-away place; Sergeant Terry's main work was growing a garden. Beside him, Jeanne Towers seemed to stare blankly; it was as if they sought an explanation of the impossible, the supernatural.

"But who would want to steal my money?" she asked dazedly. "They look everything; the hills and me—sawgets and a bottle of gold dust—"

Hammond did not answer. The door had begun to swing shut; the faint breeze therefrom was sufficient to lift a bit of paper, hitherly unpoliced, and whizz it to the floor. Jack moved for it, but the girl, with swift intuition, sped before him. She grasped it, turning it in her hand. Then, with a spasmodic movement, she crumpled it in a tightly clenched fist.

"It's—nothing," she said. Her face was bloodless.

Insects rely for protection from an approaching enemy on their sense of smell, since they are usually near-sighted.

A glass may sometimes be broken by striking a loud sound of its own keynote nearby.

(To Be Continued)

Facing The Future

Free Peoples Must Realize That They Have To Protect Their Liberty

The men in the British parliament who are demanding more armaments and speedier production are the true guides of our future policy. The past is past. Our leaders have decided, for good or ill, not to regard the dismemberment of Czechoslovakia as a climax but. It cannot be revised now, no matter how brutally Hitler's millions behave toward their fallen foes. Still, we may be very sure that the old Biblical rule still stands: "Whatsoever a man soweth, that shall he also reap."

But we must face the future. One meets a lot of very brave men these latter days since war has been finally averted who talk about what should have been done and said at Berchtesgaden and at Munich. They were not there when it looked as if war was actually coming. But all free peoples, including our verbally belligerent American friends to the south, should realize today as never before that they must be prepared to defend their liberties if they hope to continue to enjoy them.

Criticism from Canada at this time seems especially pointless. How ready are we to join the forces of the League and fight at another Armageddon? Yet if we are not ready and willing to fight, we ought at least to have the becoming modesty to keep our mouths shut!—Montreal Star.

Weather Lore

Expert Explodes Theory About Changes Of Climate

Sir Frederic Stupart, 34 years director of the meteorological service of Canada until his recent retirement, says all the talk about the weather changing down through the ages is just so much nonsense.

"I've been looking through the records of the Jesuit fathers and the weather then was just about the same as now," Sir Frederic said when reporters interviewed him regarding his coming eighty-first birthday. "About 15 years ago I prepared a paper on 'Is the Weather Changing,' and came to the conclusion that it was not. In records of 2,000 years ago there are evidences the climate in the Holy Land was not very different from what it is now."

There are "mutations or pulsations" every so often, he admitted. There was a period of cold winters in the 1870's and a mild spell in the 1830's. The coldest period in the last 150 years was around 1815 and 1816.

Sir Frederic was willing, too, to help explode the myth about the groundhog and his shadow. The activity of squirrels and a big nut harvest doesn't mean it will be a cold winter and no one is ever able to produce a satisfactory rain by scattering the clouds with bombs, he added.

Should Not Be Specialized

McGill Principal Warns Against Too Many Hobby Holes In Education

A warning that the specialization of knowledge, and the separating of it into cubby holes, was not the chief aim of education was given by Principal Lewis W. Douglas in his address at Montreal in the growing class of other students of McGill at the University Fall Convocation. Dr. Douglas maintained that specialization had been carried to such an extent that many were unqualified, by reason of the narrowness of their knowledge, to take part in the process by which man interprets all the divisions of knowledge into a co-ordinated, integrated, unified conception of living.

The Newest Potatoes

Housewives Can Now Have Choice Of Several Colors

Housewives who forever are trying to get something to harmonize with something else can now try the idea on potatoes. The Pennsylvania State Department of Agriculture, thinking perhaps of the women who upon a color scheme for the dinner table, is offering a choice of varieties. Red potatoes, pink potatoes, blues, whites, russets, yellows, whites with blue eyes, whites with red eyes, and even purple potatoes that are purple all the way through—like a beet.

The stones and timber of some Japanese temples were hoisted into place by ropes made of hair sacrificed by thousands of women and girls.

Employs Only Men

No Women Have Ever Worked For Brighton Firm

There are no flowers on the desks of directors of the business controlled by A. R. T. Perry, decorator, merchant in Brighton, England, and the south coast.

Why? Because, though Mr. Perry employs more than a hundred men and boys in his showrooms, girl employees have been banned from the business house of Perry for nearly 70 years—from the first day that his father opened the shop in Duke street, Brighton.

Boys answer the telephone, do all the typing, make the office tea. Men show women customers round. And boys do all the office cleaning—even charwomen fall under the ban.

Mr. Perry won't have it that he is prejudiced against girls. He even admits that they can excel men in business.

For 25 years he has been a leader of the Brighton and Hove Battalion of the Boys' Brigade, and it is his ambition to give every boy he can a chance in life.

As captain, commanding officer or vice-president of the battalion, he believes in the doctrine of "Give boys a chance."

His businesses are so organized that he claims no boy can find himself in a blind-alley job. All have a chance of rising to the top.

"My husband finds in his type of business that he is lucky enough to carry on without women. But he likes to see them in the home," Mrs. Perry says.

Mr. Perry's employees? The sales manager at the Duke street branch said with enthusiasm, "We prefer it this way. We don't in the least miss the feminine touch. We are happier without it."

"A female can be a disturbing influence in business. Without her there is less inclination to waste time. Every one has his own job to do and there is no question of 'Don't do that, dear, let me do it for you.'"

"Certainly no flowers on the boss' desk. They'd soon get thrown back if one tried it."

Have Real Problem

Nova Scotia Fishermen Get Very Little For Hard Work

Three Nova Scotia fishermen, after toiling from daybreak to noon, landed 423 pounds of fish.

The fishermen threaten the following report of what happened. For the catch, the fishermen were paid \$3.68.

From the \$3.68 the fishermen had to deduct \$1 for delivery to market, leaving \$2.68 to pay for three men's work, gasoline, bait, and upkeep of boat and gear.

Of the 423-pound catch, 324 pounds were sold to retail customers.

The consumers paid for those 324 pounds of fish a total of \$30.20.

Housewives paid almost ten times the gross earnings of the fishermen. Whether or not the circumstances in this specific case were exceptional we do not know. But study of prices paid to fishermen and prices paid by the consumer over a period of some weeks shows a very wide gap indeed.—Maclean's Magazine.

Features Of The Future

New Architecture Will Be Seen At Coming World's Fair

A preview of the style of architecture to be exemplified in the New York World's Fair is provided by the lavish new metropolitan night club, the Riviera. Every interior wall curves on an arc, giving each room an illusion of far greater spaciousness. The main dining room, a huge oval of 6,000 square feet, belies the compact appearance of the building's exterior.

Other "features of the future" are a disappearing 52-ton roof, a "receding" stage, a revolving stage with colored floor lights, a revolving bandstand for orchestra changes, and sliding glass walls which drop at the toss of a switch and open the huge dining room to the Hudson River's breezes.

A heat metre so sensitive that it will record the effect of a bluish has been developed by engineers interested in proper heating and ventilation of buildings.

A plow which was leaned against a tree on the Leffingwell farm, near Exira, Iowa, more than 50 years ago remains there today, firmly embedded in the tree's trunk.

Pike County, Ark., is the only place in North America where diamonds are found in any quantity.

Dancing, drinking, embracing and kissing are banned on the Japanese screen.

Britain is bidding for the world bicycle trade.

Rheumatism

JUST DO WHAT YOU SEE IN THESE PICTURES TO RELIEVE PAIN QUICKLY

1. Take a "Aspirin" Tablet with a full glass of water the moment you feel either rheumatism or muscle pain coming on.

2. You should feel relief very quickly. Relief is usually secured, rapid according to directions.

To relieve pain of rheumatism or muscle quickly, try the "Aspirin" way—shown above.

People everywhere may realize the reason "Aspirin" Tablets are economical, which makes the use of expensive "pain remedies" unnecessary. If this way fails, see your doctor.

He will find the cause and correct it. While there, ask him about taking "Aspirin" pills. We believe he will tell you there is no more effective, more dependable way normal persons may use.

Demand and Get "ASPIRIN" TRADE-MARK REG.

250 Historic Sites

Marking Stirring Events In The History Of Canada

More than 250 monuments and tablets have been erected throughout Canada during the past 16 years to mark points of historic interest which have been declared by the Historic Sites and Monuments Board of Canada as being of outstanding national importance.

An honorary advisory board, the Historic Sites and Monuments Board, composed of recognized authorities, co-operates with the National Parks Bureau and the Department of Mines and Resources in the marking and preservation of historic sites, and from the Atlantic to the Pacific stirring events in the history of Canada are recalled by tablets and monuments erected by the government.—Canadian Resources Bulletin.

Plenty When It Came

Oklahoma City Suffered A Flood After Water Shortage

It was tough when Disney, Oklahoma, was without water. It was just as tough when water came. Short of supply since mid-July, residents left their faucets open constantly to catch every drop that entered the mains. City engineers found a good flow, hooked it on without notice. The new water supply boomed into the mains, the faucets, the homes. Disney suffered a flood.

Radium is worth 25,000 times as much as gold.

France produces enough wine in a single year to float 165 battleships.

A honey bee, in making a pound of honey, visits 55,000 clover blossoms.

Mr. and Mrs. George Sifko, of Natal, are being congratulated upon the arrival of a new son on October 11th.

Only the grace of God and a liberal dose of horse sense can prevent a man from becoming spoiled by an overdose of prosperity.

The Alberta Nazi salute has not changed. It is still the right hand extended, palm upwards, accompanied by the motto "Gimme."

Another hitch: A merchant must have a credit house account in order to get cash for a voucher accepted in his store. Wouldn't it be nice if such was required of us by the banks?

J. H. Unwin, Social Credit member for Edson in the Alberta legislature, was barred from the annual meeting of the Manitoba Social Credit League as a "trouble maker."

Found with goods taken from a store, said to be in Blairmore, in a rooming house in Calgary, George Harper, of no fixed abode, was sentenced to six months with hard labor when he pleaded guilty in a Calgary police court.

An order permitting the National Trust Company Limited to take possession of chattel properties of the Christian Community of Universal Brotherhood of Alberta, Limited (Doukhobors, Cowley and Lundbreck), was granted by Mr. Justice Shepherd at Edmonton.

The new half million dollar tipple at Michel is now in full operation. It is a magnificent piece of machinery, and is turning out a wonderful product, according to reports. For the past eight months builders have labored hard and earnestly, and they have produced one of the finest tipple in Canada, if not in America.

Lobo's amateur hour went over big at Cranbrook, according to press reports.

Mr. and Mrs. Harry Moore have returned from an extended holiday trip to points in Eastern Canada.

Alberta is being threatened with another epidemic, this time technocracy. Gas masks may become necessary.

It has now been definitely decided that the Trail Smoke Eaters will tour Britain and the European continent this winter.

Sign in a grocery window: "The world is coming to an end. Please pay your bill now, so we won't have to hunt all over hell for you."

Murray S. Saunders has been elected president of the Alberta branch of the North West Travellers' Association, succeeding J. G. Anderson, of Edmonton.

Five persons were convicted and fined \$25 and costs each or three months in jail for conducting a series of robberies from the Safeway store at Nelson.

A special session of the Alberta legislature has been called to convene November 15th, chiefly to deal with the Turner Valley gas and petroleum situation.

Constable Stan Hawkins, of the R.C.M.P. detachment at Blairmore, is visiting at the home of his father, Mr. R. E. Hawkins, after an absence of five years.—Drumheller Mail.

Mr. and Mrs. George Chisarovano, of Bellevue, announce the engagement of their daughter, Esther, to Mr. T. M. Allen, junior, of Taber, the marriage to take place in November.

So far no damage has been done the recently-painted walls of the post office lobby, but some creature has made use of a knife or some other edged instrument to destroy several public notices. Some day, and very shortly, too, some such individual will be punished.

Local and General Items

The Editor will be glad to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, showers, presentations, anniversaries, etc. Phone items in to 11 or hand them in at The Enterprise office not later than Thursday evenings.

Referring to spiral columns, an exchange put it "spiral columns."

Strenuous efforts are being made by the mounted police to curb auto speeding in The Pass.

More than half of the 32 American college students selected as 1935 Rhodes scholars were Boy Scouts.

Blairmore was enfeited with bunting and joy last Friday, the occasion being an official visit from Chief "Red" Rorstrum, of Stavely.

Fred Norgard and Wilfred Beaulier, of Clareholm, in company with a couple of friends from Frank, are away in the mountains after sheep and goat.

Miss Margaret Stevenson, formerly of Hillcrest, has arrived in Calgary from Montreal to take up residence with her parents, Mr. and Mrs. Wm. Stevenson.

Angus McKay, of Carstairs, has been appointed to succeed the late Robert Faulds as chief of police at Taber. The new chief is twenty-nine years of age, and looks young at that.

The only difference between Germany and Alberta today is that in Germany they ban both the press and Communists from caucus meetings, while in Alberta only the press is banned.

A new dance has been conceived at Hollywood, to be known as the "sour grapes." So much sadness has been created by the "big apple" that it is hoped to even go further with the new dance.

Joseph Howe, who has been in the employ of the Consolidated Mining & Smelting Co. at Yellowknife for a considerable time, returned home Tuesday to visit for a while with his family prior to taking up a position at Kimberley.

Two Chinese coolies were arguing heatedly in the midst of a crowd. When an onlooker expressed surprise that no blows were struck, his Chinese friend said, "The man who strikes first admits that his ideas have given out."

Recently the editor of the Stavely Advertiser became the father of a new baby, and the people of that thriving settlement somewhat reversed the general order of things and staged a series of baby showers for the proud dad.

The marriage of Miss Marie Chatson, daughter of Mr. and Mrs. L. Chatson, of Kimberley, to Mr. William (Bill) Burnett, star Dynamiter defenceman, took place at Cranbrook on Wednesday of last week. They will reside in Kimberley.

Daily papers have been in much greater demand since Aberhart's exhortation a couple of weeks ago to ban the daily press from the homes. An exchange remarks: "It would be better if the speaker used his time in giving his hearers better food for thought in this much distressed world."

Premier Aberhart may call the press yellow, but he must admit that the press is still a powerful agency for keeping their readers well informed. The dear people still heed the good advice "Read a newspaper and keep informed." And notwithstanding all Mr. Aberhart has to say about the newspapers, the thousands of newspaper readers throughout Alberta do not feel that they are in any way being corrupted by reading the news furnished or views given by the press of Alberta. To tell a person not to read the newspaper is to tell them to remain in a state of ignorance as to what is going on here, there and everywhere.—Drumheller Review.

The mounted police have withdrawn from Penitence.

It used to be "Yes, we have no bananas today," but now it is "Yes, we have no sponsors today."—Ex.

So far this year, new telephones have been installed at Roseland at the rate of four per month.

You can easily tell the man who bosses his wife. All other wives say: "Gee, I wish I had him for about a week."

Thank goodness unemployment was not made retroactive. Some of the people now getting it have been unemployed since birth.

Wonder if Premier King will visit all Canadian ridings prior to the next federal election to make final choice of pet candidates?

Dr. R. J. Manion has been nominated for the London, Ontario, seat, and London Liberals will not oppose him on the suggestion of Premier King.

See the new line of Christmas and New Year cards at The Enterprise office. Orders taken now for delivery any time in December. Secure yours now while the selection is good.

Though some forty licenses to shoot antelope were granted this season at Brooks, very few were successful in landing a trophy. It is hard to get within rifle range of them.

The police of Zagreb, Yugoslavia, require violators of traffic ordinances to pull over to the side of the road and defate all tires. The number of accidents on the streets of the city has fallen considerably.

The marriage of Miss Margaret Maude, daughter of Mr. and Mrs. J. L. Allen, of High River, to Duncan McKerricher, of Calgary, son of Mr. and Mrs. Archie McKerricher, of Pincher Creek, took place at High River on October 15th.

According to reports, the Aberhart government are certainly collecting from the farmers on the proceeds of this year's crops, and the other creditors in different cases are getting what the little boy shot at and missed.—Drumheller Review.

The doctrine of human equality reposes on this: That there is no man really clever who has not found that he is stupid. There is no big man who has not felt small. Some men never feel small, but these are the few men who are.—G. K. Chesterton.

Dorothy Thompson says: "Let us not call this peace. This is peace without virtue—peace established on lawlessness, established by dictatorship, established on betrayal. Therefore, it is not peace, but the initiation of a terrific world crises."

Wednesday and Friday of last week were busy days at Lundbreck, when practically two trainloads of cattle from the district were shipped out, all prime beef stuff. On Wednesday fifteen cars were loaded and on Friday eighteen. Carload averages about 25 head and at the prices offered would represent about \$1100 per carload, the total two-day shipments representing approximately \$30,000.

Messrs. Swann and Teasdale, of the provincial rural assessment staff, were in town last week end, and on Saturday attended a court of revision at Bellevue, when quite a number of appeals against a recent assessment were considered and some adjustments made. The assessment complained of, represented a new idea of taxation introduced by the Aberhart government, which is claimed by many to be unnecessary and most unjust.

Mrs. W. Archer lies critically ill at her home in West Blairmore.

E. K. Stewart has been elected president of the Fernie Liberal Association.

"Yes, we have no frost this week," the last week of October. No, have we any now.

The sixth Imperial Press Conference will be held in Canada in 1940, likely at Ottawa.

A lot of persons owe their goodness to the fact that they have never been tempted.

Someone has estimated that Southern Alberta has had 78 sunny days out of the past three months.

A meeting of the Blairmore Fish and Game Protective Association will be held at The Enterprise office on Tuesday night next at 8 o'clock, when affairs of the season will be wound up.

When the funeral service was being conducted in a New York church for a man who had passed away suddenly, leaving a family of nineteen children, the officiating minister took as his text the words: "Well done, good and faithful servant."

The Livelihood of Every Man, Woman and Child
in the Mining Towns of the Crows' Nest
Pass depends on the production of

- COAL -

The Railways are by far the Largest
Consumers of Coal from this district.

It follows, therefore, that every passenger or article
carried by bus or truck means so much less coal consumed
by the Railroads, shorter working time and
lower earnings of those employed in the Coal Industry.
